Consolidated **CORPORATE GOVERNANCE** Report

UNIQA has been committed to compliance with the Austrian Code of Corporate Governance since 2004 and publishes the declaration of conformity both in the Group report and on www.uniqagroup.com in the Investor Relations section. The Austrian Code of Corporate Governance is also publicly available at www.uniqagroup.com and www.corporate-governance.at.

The Corporate Governance Report and the Consolidated Corporate Governance Report of UNIQA Insurance Group AG are summarised in this report in accordance with Section 267b in conjunction with Section 251(3) of the Austrian Commercial Code.

Implementation and compliance with the individual rules in the Austrian Code of Corporate Governance, with the exception of Rules 77 to 83, are evaluated annually by PwC Wirtschaftsprüfung GmbH. Rules 77 to 83 of the Austrian Code of Corporate Governance are evaluated by the law firm Schönherr Rechtsanwälte GmbH. The evaluation is carried out based mainly on the questionnaire, published by the Austrian Working Group for Corporate Governance, for the evaluation of compliance with the Code. The reports on the external evaluation in accordance with Rule 62 of the Austrian Code of Corporate Governance can also be found at www.uniqagroup.com.

The Supervisory Board is supported by Vienna Strategy HUB GmbH with self-assessments of the Supervisory Board regarding the efficiency of its activities (Rule 36 of the Austrian Code of Corporate Governance).

UNIQA also declares its continued willingness to comply with the Austrian Code of Corporate Governance as currently amended. However, UNIQA deviates from the provisions of the Code as amended with regard to the following C rules (comply or explain rules), and the explanations are set out below.

Rule 49 of the Austrian Code of Corporate Governance

Due to the growth of UNIQA's shareholder structure and the special nature of the insurance business with regard to the investment of assets, there are a number of contracts with companies related to individual members of the Supervisory Board in which these Supervisory Board members discharge duties as members of governing bodies. If such contracts require approval by the Supervisory Board in accordance with Section 95(5)(12) of the Austrian Stock Corporation Act (Rule 48 of the Austrian Code of Corporate Governance), the details of these contracts cannot be made public for reasons of company policy and competition law. All transactions are in any case entered into and processed on an arm's length basis.

Members of the Management Board

Name	Responsible for	Supervisory Board appointments or comparable functions in other domestic and foreign companies not included in the consolidated financial statements
Andreas Brandstetter , Chief Executive Officer (CEO) * 1969, appointed 1 January 2002 until 30 June 2024	Strategy & Transformation, UNIQA Ventures, New Business Areas (Health), Group General Secretary, Auditing, Art Insurance (until 31 July 2020)	<ul style="list-style-type: none"> ▪ Member of the Supervisory Board of STRABAG SE, Villach ▪ Member of the Advisory Board of the KHM Association of Museums, Vienna

The work of the Management Board

The work of the members of the Management Board of UNIQA Insurance Group AG is regulated by the rules of procedure. The allocation of the business responsibilities as decided by the Group Management Board is approved by the Supervisory Board. The rules of procedure govern the obligations of the members of the Management Board to provide the Supervisory Board and each other with information and approve each other's activities. The rules of procedure also specify a list of activities that require consent from the Supervisory Board. The Management Board generally holds weekly meetings in which the members of the Management Board report on the current course of business, determine what steps should be taken and make strategic corporate decisions. In addition, there is a continuous exchange of information between the members of the Management Board regarding relevant activities and events.

From 1 January 2020, all members of the Management Boards of UNIQA Österreich Versicherungen AG and UNIQA International AG participated in the meetings of UNIQA Insurance Group AG with an advisory vote (Group Executive Board). Since 1 July 2020, the meetings of the Management Boards of UNIQA Insurance Group AG and UNIQA Österreich Versicherungen AG, which are composed of the same people, have been held as joint sessions.

The Management Board informs the Supervisory Board at regular intervals, in a timely and comprehensive manner, about all relevant questions of business development, including the risk situation and the risk management of the Group. In addition, the Chairman of the Supervisory Board is in regular contact with the CEO to discuss the company's strategy, business performance and risk management.

The work of the Supervisory Board and its committees

The Supervisory Board advises the Management Board in its strategic planning and projects. It decides on the matters assigned to it by law, the Articles of Association and its rules of procedure. The Supervisory Board is responsible for supervising the management of the company by the Management Board. It is comprised of ten shareholder representatives and five employee representatives, and it convened for seven meetings in 2020. Five decisions were made by way of circular resolution. All members of the Supervisory Board attended more than half of the meetings of the Supervisory Board in the 2020 financial year either in person, or virtually via telephone or video conference.

A Committee for Board Affairs has been appointed to handle the relationship between the company and the members of its Management Board relating to employment and salary; this committee also acts as the Nominating and Remuneration Committee and is composed of the members of the Executive Committee of the Supervisory Board. The Committee dealt with the remuneration strategy and succession planning in three meetings in 2020.

The Working Committee of the Supervisory Board is only called upon to make decisions if the urgency of the matter means that the decision cannot wait until the next meeting of the Supervisory Board. It is the Chairman's responsibility to assess the urgency of the matter. The resolutions passed must be reported in the next meeting of the Supervisory Board. Generally, the Working Committee can make decisions on any issue that is the responsibility of the Supervisory Board, but this does not include issues of particular importance or matters that must be decided upon by the full Supervisory Board by law. The Working Committee did not convene for any meetings in 2020. One decision was made by way of circular resolution.

The Audit Committee of the Supervisory Board performs the duties assigned to it by law. The Audit Committee convened for three meetings, which were also attended by the statutory auditor of the (consolidated) financial statements. The meetings dealt with all the documents relating to the financial statements, the Corporate Governance Report and the appropriation of profit proposed by the Management Board (each for the 2019 financial year). Furthermore, the audit of the 2020 financial statements of the companies of the consolidated group was planned, and the statutory auditor

reported on the results of preliminary audits. In particular, the Audit Committee received quarterly reports from Internal Audit concerning audit areas and material findings based on the audits conducted.

The Investment Committee advises the Management Board with regard to its investment policy; it has no decision-making authority. The Investment Committee held four meetings during which the members discussed the capital investment strategy, questions concerning capital structure and the focus of risk management and asset liability management.

The IT Committee dealt with the ongoing monitoring of the progress of the project implementing the UNIQA Insurance Platform (new core IT system) over the course of four meetings.

The newly established Digital Transformation Committee held two meetings in 2020 in which it dealt with the digitalisation of core processes, the reduction in complexities in the product portfolio and the consolidation of digital work processes related to customers and employees.

The chairmen of the respective committees informed the full Supervisory Board about the meetings and their committees' work.

For information concerning the activities of the Supervisory Board and its committees, please also refer to the details in the Report of the Supervisory Board.

As the shareholder representatives are composed of the same individuals, the Supervisory Board of UNIQA Insurance Group AG meets in a joint session with the Supervisory Board of UNIQA Österreich Versicherungen AG.

Independence of the Supervisory Board

All members of the Supervisory Board elected during the Annual General Meeting have declared their independence under Rule 53 of the Austrian Code of Corporate Governance. Both Anna Maria D'Hulster and Jutta Kath also fulfil the criteria of Rule 54 of the Austrian Code of Corporate Governance, as they are not shareholders with a stake of more than 10 per cent and they equally do not represent the interests of this group.

A Supervisory Board member is considered independent if he or she is not in any business or personal relationship

with the company or its Management Board that represents a material conflict of interest and is therefore capable of influencing the behaviour of the member concerned.

UNIQA has established the following additional criteria for determining the independence of a Supervisory Board member:

- The Supervisory Board member should not have been a member of the Management Board or a senior executive of the company or a subsidiary of the company in the past five years.
- The Supervisory Board member should not maintain or have maintained within the last year any business relationship with the company or a subsidiary of the company that is material for the Supervisory Board member concerned. This also applies to business relationships with companies in which the Supervisory Board member has a significant economic interest, but does not apply to functions performed on decision-making bodies in the Group.
- The Supervisory Board member should not have been an auditor of the company or a shareholder or salaried employee of the auditing company within the last three years.
- The Supervisory Board member should not be a member of the Management Board of another company in which a Management Board member of the company is a member of the other company's Supervisory Board unless one of the companies is a member of the other company's group or holds an investment in the other company.
- The Supervisory Board member should not be a member of the Supervisory Board for longer than 15 years. This does not apply to Supervisory Board members who are shareholders with a business investment or who are representing the interests of such a shareholder.
- The Supervisory Board member should not be a close family relative (direct descendant, spouse, life partner, parent, uncle, aunt, sibling, niece or nephew) of a Management Board member or of persons who are in one of the positions described in the above points.

Measures to promote women on the Management Board, the Supervisory Board and in executive positions

UNIQA is convinced that a high degree of diversity can enhance its success on a sustainable basis. Diversity makes employees successful together and has a positive influence on corporate culture. In this context, diversity means different nationalities, cultures and a collective of men and women, especially in executive positions. Together, they contribute to the diversity of thought.

With Marie-Valerie Brunner, Anna Maria D'Hulster and Jutta Kath, three women have been elected to join the Supervisory Board of UNIQA Insurance Group AG. The proportion of female Supervisory Board members among the elected members (shareholder representatives) therefore amounts to the legally required 30 per cent. Sabine Andre was appointed to the group of employee representatives on the Supervisory Board on 20 May 2019, with Irene Scheiber appointed on 20 May 2020. At 40 per cent, the proportion of female Supervisory Board members among employee representatives therefore exceeds the 30 per cent required by law.

A total of nine Management Board members were appointed to the Management Boards of UNIQA Insurance Group AG and UNIQA Österreich Versicherungen AG in Austria in 2020, none of whom were women. However, because UNIQA is convinced that a high level of diversity at all levels can sustainably increase the company's success, the Management Board made a clear commitment in October 2020 to the objective of including more women in management positions. A multitude of different perspectives means that the relevant risks can be identified in good time, with better decisions made and the full potential for innovation exploited. Following the UNIQA transformation in the international companies, the board and executive levels show a share of women at 31 per cent (19 women and 43 men).

Of a total of 509 managers at the Austrian location, 158 are women, which corresponds to a share of 31 per cent. In the UNIQA Group's international companies outside Austria, 329 of a total of 678 managers are currently women, which equates to 48.5 per cent. In the entire UNIQA Group, the average number of female managers is 39.4 per cent (487 of a total of 1,187 persons).

Diversity concept

The development of a comprehensive diversity concept was continued consistently in 2020 and has now also been reflected within the organisation with the appointment of Ulrike Kienast-Salmhofer as Diversity & Inclusion Officer as at 1 August 2020. Three aspects were added to the priorities selected in 2019 and defined as specific objectives for upcoming years:

1. Women in management – more women in management positions
2. Compensation fairness – equal pay for work of equal value
3. Generation management – old and young together contribute to the success of the company
4. People with disabilities – integrate, promote and offer positions where they can use their strengths
5. Achieving a work/life balance
6. Internationality and background – using internationality and cultural diversity as a strength
7. Sexual orientation – all sexual orientations and identities are respected

Another workshop was held with Board members in September 2020 on the topic of unconscious bias. A mandatory module “Unconscious Bias. Inclusive Leadership” was introduced in the newly launched #leader_ship programme for all managers as a logical next step. UNIQA recognises that self-reflective confrontation with an individual’s own unconscious prejudices is the most important prerequisite for practising diversity in everyday life.

Women in management

UNIQA has acknowledged that equal participation of women in all processes and at all levels in the company is a crucial competitive factor. The Women’s Career Index was launched in the fourth quarter of 2020 as a well-founded assessment of the current situation aimed at pursuing the objective of more women in management positions in an even more structured and effective manner going forward. This has provided UNIQA with a tool to determine its standpoint regarding the topic as well as a way to measure and manage the company’s equality objectives.

The women’s network “Women with Power – Network Now” established in November 2020 involved the introduction of an initiative to exchange experiences, at the same time supporting the professional development of women and identifying any obstacles for that. More than 70 women from all areas of UNIQA provided strong momentum at the launch event.

UNIQA also constantly provides opportunities for personal development. The successful cooperation initiatives continued for instance with Female Founders and Business Riots. Even though the measures imposed as a result of the coronavirus required some changes to be made from March 2020, three female managers were able to take part in the three-month digital leadership programme Lead F, as well as to gain valuable insights from various events.

Improving work/life balance plays a clear role in equal opportunities. Important experiences from expanding working from home options in the context of the coronavirus crisis have given this topic particular momentum. In the sense of “smart working”, a significant expansion of flexible working options is being evaluated for when the pandemic is over.

UNIQA was awarded the equalitA seal of approval for the internal promotion of women in November 2020 as a result of these initiatives, which were able to build on existing foundations. UNIQA sees this seal of approval, which is awarded by the Federal Ministry for Digital and Economic Affairs, primarily as a mandate to promote gender equality more forcefully and sustainably going forward.

Generation management

The UNIQA Group has continued to deal with the issue of how it can make even more targeted use of the age diversity in the company in future, optimise the transfer of knowledge and further promote intergenerational cooperation. The “Get ready” format launched in the previous year was used in this context, and the topic of generations in 2020 was covered as part of an event.

Transfer of knowledge was defined as a priority within the scope of the demography consultation. Its objective is to provide UNIQA managers with tools that enable a structured, appreciative and comprehensive handover when people with knowledge and experience leave the organisation.

People with disabilities

Following the preliminary work completed in previous years, UNIQA began an intensive collaboration with myAbility in 2020. In addition to participating in and supporting events, such as the myAbility Lounge in February and the Disability Comfort Day in November, UNIQA also became a member of the myAbility Business Forum. The myAbility Business Forum is the largest B2B network on the topic of business and disability in the German-speaking world. Its objective is to achieve an economy accessible to all.

The fourth quarter of 2020 also saw the launch of the Disability Performance Check at UNIQA. This initiative aims to provide a well-founded assessment of the current situation as well as starting points for effective measures aimed to enhance inclusion of people with disabilities at UNIQA.

UNIQA's fundamental stance against any form of exclusion or discrimination was underlined by numerous points. For example, the UNIQA Tower was illuminated with orange lights to commemorate the International Day for the Elimination of Violence against Women as part of the "Orange the World" campaign, and it glowed in purple on the International Day of People with Disabilities ("Purple Light Up" campaign). UNIQA was also one of the first companies in Austria to sign the #positivarbeiten ("working positively") declaration, an initiative by the Austrian AIDS charity, "AIDS-Hilfen Österreich", to promote a working environment free from discrimination for people who are HIV-positive.

Remuneration Report

The Remuneration Report is prepared by the Supervisory Board of UNIQA Insurance Group AG in accordance with Section 78c of the Austrian Stock Corporation Act and will be submitted to a vote at the Annual General Meeting on 31 May 2021.

Risk report, directors' dealings

A comprehensive risk report (Rules 69 and 70 of the Austrian Code of Corporate Governance) is included in the notes to the consolidated financial statements. The notifications concerning directors' dealings in the year under review (Rule 73 of the Austrian Code of Corporate Governance) can be found in the Investor Relations section of the Group website at www.uniqagroup.com.

External evaluation

Implementation of, and compliance with, the individual rules in the Austrian Code of Corporate Governance were

evaluated by PwC Wirtschaftsprüfung GmbH for the 2020 financial year – with the exception of Rules 77 to 83. Rules 77 to 83 of the Austrian Code of Corporate Governance are evaluated by the law firm Schönherr Rechtsanwälte GmbH. The evaluation is carried out based mainly on the questionnaire, published by the Austrian Working Group for Corporate Governance, for the evaluation of compliance with the Code.

The evaluation by PwC Wirtschaftsprüfung GmbH and Schönherr Rechtsanwälte GmbH confirming that UNIQA complied with the rules of the Austrian Code of Corporate Governance in 2020 – to the extent that these rules were covered by UNIQA's declaration of conformity – will be published simultaneously with the annual financial report for the 2020 financial year. Some of the rules were not applicable to UNIQA in the evaluation period.

Report of the SUPERVISORY BOARD

Dear Shareholders,

We had barely set the structural and staff-related course for the future of the UNIQA Group at the end of 2019 when 2020 began with two major upheavals: the strategically important acquisition in Eastern Europe in February and the emergence of Covid-19 in March. I am dividing my report into three parts in order to give you a good overview of the work of the Supervisory Board in this special transformation year.

1. The most important features of 2020

The **first meetings of the year** were dedicated to the largest acquisition in UNIQA's corporate history: the Supervisory Board dealt intensively with the financial situation of the **AXA companies in Poland, the Czech Republic and Slovakia** at the time along with their development potential. We paid special attention to various options for financing the purchase price of approximately €1 billion as well as to possible effects on the leverage ratio, risk capital, solvency ratio and the applicable balance sheet items of our Group.

The Management Board and Supervisory Board were involved intensively with the possible **consequences of Covid-19** from the **second half of the first quarter**. The focus was on the potential impact on our clients, employees, business performance, risk modelling and profit forecasts, as well as the possible consequences for our dividends. The Supervisory Board held weekly discussions with the Management Board in the second quarter regarding the most significant decisions of the internal Covid-19 crisis team.

The **operating principles for our Supervisory Board** and all its committees also changed abruptly in the second quarter: All meetings of the Supervisory Board were held virtually from April onwards, with one exception in the summer. First of all, we had to learn how to handle this technically and in terms of Group dynamics. We soon realised that even better preparation of the written documents, strict meeting discipline and good time management

would make a particularly effective contribution towards significantly increasing the quality and therefore the efficiency of our digital meetings. The decision to hold the **Annual General Meeting** virtually was not an easy one for us either – following the capital increase in October 2013, the “Re-IPO”, active and modern capital market cultivation and therefore personal discussions with you as our shareholders are a key concern of the Management Board and Supervisory Board.

From the middle of the year, our work was focused on the details of our new “**UNIQA 3.0 – Seeding the Future**” **strategic programme**. Aligning the findings from the Covid-19 pandemic with the essential cornerstones of UNIQA 3.0 was of particular concern to the Supervisory Board here: are our assumptions still correct regarding how society and customer needs will evolve by 2030? Are there any new trends that we had not considered adequately prior to this? Do certain initiatives need to be prioritised differently by the Management Board? Can the promises made by the Management Board with UNIQA 3.0 be kept to you as shareholders, including the impact of Covid-19? We deliberately took a few months longer than originally planned for this discussion process and only took the relevant decisions at our last meeting of the year in November.

Due to the concentration of topics with major strategic importance, we had little time to reflect on the **quality of our cooperation within the Supervisory Board** over the course of the past year. At the same time, a significant need for constant further development of our activities and our capabilities has become apparent in an environment subject to dynamic and even disruptive change, particularly as a result of Covid-19. Towards the end of the year, we therefore decided to appoint Werner H. Hoffmann, Head of the Institute for Strategic Management at the Vienna University of Economics and Business, to support us in a structured process to optimise cooperation within the Supervisory Board. The results are expected in the course of 2021.

2. Timeline and details of our main areas of focus

In the course of 2020, the Supervisory Board was regularly informed by the Management Board about the business performance and position of UNIQA Insurance Group AG and the Group as a whole. It also supervised the Management Board's management of the business and fulfilled all the tasks assigned to the Supervisory Board by law and the Articles of Association. At the Supervisory Board meetings, the Management Board presented detailed quarterly reports and provided additional oral as well as written reports. The Supervisory Board was given timely and comprehensive information about measures requiring our approval.

No informational events or special seminars were held for the Supervisory Board in 2020 due to the restrictions imposed through the Covid-19 pandemic.

Focus of our deliberations

The Supervisory Board met on seven occasions in 2020. Our meetings focused on the respective earnings situation within our Group and its further strategic development. We also made five decisions by way of circular resolution.

- We discussed the results of the due diligence of the AXA Group companies for sale in Poland, the Czech Republic and Slovakia at an extraordinary meeting on **14 January** and approved the submission of a binding offer by UNIQA.
- At our meeting held on **19 February**, we mainly dealt with the preliminary results of the Group in the 2019 financial year and the status of talks with AXA on the takeover of the AXA Group companies in Poland, the Czech Republic and Slovakia. We also received reports on the status of the UNIQA 3.0 strategic programme and examined the options for restructuring the Austrian Group structure.
- On **10 April** the shareholder representatives on the Supervisory Board passed a resolution in writing to meet the minimum proportion of women and men on the Supervisory Board required by law separately from the employee representatives on the Supervisory Board.
- The Supervisory Board's (virtual) meeting on **15 April** focused on the audit of the annual financial statements and consolidated financial statements for the year ended 31 December 2019 and on the reports from the Management Board regarding the latest developments in the Group in the first quarter of 2020. We also discussed the

agenda for the 21st Annual General Meeting held on 25 May 2020, in particular the proposed appropriation of profits and the proposal to the Annual General Meeting to elect PwC Wirtschaftsprüfung GmbH as statutory auditors for the 2021 financial year. The report by auditors PwC Wirtschaftsprüfung GmbH and lawyers Schönherr Rechtsanwälte GmbH regarding compliance with the provisions of the Austrian Code of Corporate Governance (ÖCGK) in the 2019 financial year was also acknowledged.

- We passed a resolution on **27 April** by way of circular resolution to propose Johann Strobl for election to the Supervisory Board at the 21st Annual General Meeting on 25 May 2020. A subsequent special election was required following the resignation of Erwin Hameseder.
- At the (virtual) meeting on **20 May**, we looked in detail at the Group's results in the first quarter of 2020.
- The Supervisory Board was constituted by way of circular resolution on **25 May** and, following Erwin Hameseder's resignation from the Supervisory Board, Johann Strobl was elected to the Executive Committee, the Committee for Board Affairs, the Working Committee and the Audit Committee of the Supervisory Board.
- We also passed a resolution in writing on **25 May** to appoint the (additional) Management Board members of UNIQA Österreich Versicherungen AG and UNIQA International AG (the company ceased to exist as a result of the merger on 8 December 2020) to the Management Board, which will now consist of nine members going forward, in accordance with the modified organisational structure of the Austrian insurance Group with effect from 1 July 2020. The Management Board of UNIQA Österreich Versicherungen AG was set up with the same individuals as were on the company's Management Board as at 1 July 2020. Similarly, the Supervisory Board of UNIQA Österreich Versicherungen AG also consisted of the same individuals as the company's Supervisory Board on 25 May 2020. The same individuals appointed to all committees of the Supervisory Board at the level of UNIQA Insurance Group AG were appointed at the level of UNIQA Österreich Versicherungen AG, including with identical responsibilities. Meetings of the company's Supervisory Board and its committees will be held to coincide with the corresponding meetings of UNIQA Österreich Versicherungen AG from 25 May 2020.

- At our (virtual) extraordinary meeting on **23 June** we discussed the operational development of the AXA companies in Poland, the Czech Republic and Slovakia acquired through the purchase agreement of 7 February 2020 as far as possible before closing, and the status of the competition law proceedings before the EU Commission, as well as the status of the proceedings before the local supervisory authorities required for the completion of the transaction. We also discussed the possible options available for financing the acquisition price.
- On **29 June**, we finally approved by way of circular resolution the issue of a senior bond with a value of up to €600 million and a hybrid capital bond (“Green Bond”) with a value of up to €200 million.
- On **19 August**, we discussed the Group’s earnings in the first half of 2020 and developments in the third quarter of 2020. We also focused intensively on the development of the future UNIQA 3.0 strategic programme (including the “Cherrisk” and “Emerging Business Opportunities” business areas).
- In addition to reporting on the Group’s profits in the first three quarters of 2020 and ongoing developments in the fourth quarter of 2020, our (virtual) meeting on **18 November** also covered the updated forecast for the 2020 financial year and the report on the Own Risk and Solvency Assessment (ORSA) 2020. One-off measures affecting the 2020 financial statements (headcount reductions, impairments) were acknowledged. We also approved the UNIQA 3.0 strategic programme (in particular the investments in the “Cherrisk” and “Emerging Business Opportunities” business areas) and adopted the budget for 2021 as well as the medium-term planning up to 2025. A new process was introduced for evaluating the activities of the Supervisory Board in accordance with the Austrian Code of Corporate Governance.

Committees of the Supervisory Board

In addition to the Audit Committee required by law, we have set up a further five committees in order to ensure that the work of our Supervisory Board is structured effectively.

- The work of the **Executive Committee** of the Supervisory Board, which consists of the same members as the **Committee for Board Affairs** and the **Nominating and Remuneration Committee** for the Management Board, was also of particular significance in 2020. The Committee dealt intensively with the final developments to the UNIQA 3.0 strategic programme and the remuneration strategy of the extended Management Board over the course of multiple meetings.
- The **Audit Committee** held three meetings in 2020 and these meetings were also attended by the auditors of the (consolidated) financial statements. All documents relating to the financial statements were discussed at the (virtual) meeting on 15 April, with the proposal for the appropriation of profits adjusted with the agreement of the Management Board. The annual activity report 2019 from the Compliance Officer was also submitted and acknowledged. At the (virtual) meeting held on 20 May, the auditor presented the plans for the audit of the 2020 financial statements prepared by the companies in the UNIQA Group and coordinated this planning and strategy with the Committee. At the (virtual) meeting held on 18 November, the auditor informed the Committee about the findings from its preliminary audits. In addition, the Committee received quarterly reports from Internal Audit on the areas audited by this department and any material findings that arose from these audits.
- The **Investment Committee** held four meetings at which the members discussed the capital investment strategy, questions concerning capital structure and the focus of risk and asset liability management.
- The **IT Committee** dealt with the ongoing monitoring of the progress of the project implementing the UNIQA Insurance Platform over the course of four meetings.
- The new **Digital Transformation Committee** established on 23 June 2020 held two meetings dedicated to the digitalisation of core processes, the reduction of complexities in the product portfolio and the consolidation of digital working processes related to customers and employees.

- The **Working Committee** did not hold any meetings in the past financial year. A decision was taken by way of circular resolution to sell a property.

The various chairs of the committees then informed the members of the Supervisory Board in detail about the meetings and their committee's work.

3. Separate and consolidated financial statements

The separate financial statements prepared by the Management Board, the Management Report of UNIQA Insurance Group AG, the consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRSs) and the Group Management Report for 2020 were audited by PwC Wirtschaftsprüfung GmbH; the statutory auditor also verified that a separate consolidated non-financial report and a consolidated corporate governance report had been prepared for the 2020 financial year. The audit raised no objections. The separate and consolidated financial statements were each awarded an unqualified audit opinion for 2020.

The Supervisory Board acknowledged and approved the findings of the audit.

The evaluation of UNIQA's compliance with the rules of the Austrian Code of Corporate Governance in the 2020 financial year was carried out by PwC Wirtschaftsprüfung GmbH, whereas compliance with Rules 77 to 83 of the Austrian Code of Corporate Governance was assessed by Schönherr Rechtsanwälte GmbH. The audits found that UNIQA had complied with the rules of the Austrian Code of Corporate Governance in the 2020 financial year – to the extent that they were included in UNIQA's declaration of conformity.

The Supervisory Board acknowledged the consolidated financial statements for 2020 and approved the 2020 annual financial statements of UNIQA Insurance Group AG. It also endorsed both the Management Report and the Group Management Report. The 2020 annual financial statements were thereby adopted in accordance with Section 96(4) of the Austrian Stock Corporation Act.

The Supervisory Board reviewed and approved the proposal for the appropriation of profit submitted by the Management Board. Accordingly, a dividend distribution of €0.18 per share will be proposed to the Annual General Meeting on 31 May 2021.

Once again this year on behalf of the entire Supervisory Board, I would like to thank all employees of UNIQA Insurance Group AG and all Group companies for their major personal commitment in the 2020 financial year and wish them every continued success for their future.

Vienna, April 2021

Group Management Report

Economic environment

Economic development was shaped above all by the coronavirus pandemic and the associated restrictions in 2020. At the beginning of the spring, the rapidly rising Covid-19 figures in the eurozone led to some harsh restrictions on business activities. This was accompanied by an unprecedented recession affecting almost all sectors of the economy. As a result, GDP in the eurozone fell by approximately 15 per cent cumulatively in the first half of 2020, and industrial production in April 2020 was almost 30 per cent below the level at the beginning of the year. Unlike in previous crises, sharp fluctuations were observed not only in cyclical sectors, but also in the service sector and private consumption.

Starting in May 2020, economic activity in the eurozone rose again once the restrictions were relaxed, and some areas were even able to catch up with pre-coronavirus levels again. However, this should not hide the fact that production output and consumer demand lost in the spring were not compensated by a long shot, and that overall economic output in the third quarter was still around 4 per cent below the levels at the end of 2019. To control the rapidly increasing spread of Covid-19, some severe restrictions were reintroduced in Europe from September 2020 onwards, particularly in November 2020. The service sector in particular and therefore private consumption were also severely affected by this. In the winter of 2020/2021, we therefore expect a further decline in macroeconomic activity, but it is likely to be significantly less extreme than in the first half of 2020.

The slump in consumer demand caused by the business environment also put a dampener on inflation. While inflation was still at 1.4 per cent p.a. at the beginning of 2020, and the rate of inflation slipped in to a negative range from August onwards. The ECB responded to the coronavirus crisis and its accompanying effects with a comprehensive easing of monetary policy. It offered additional refinancing possibilities for banks, while

making the conditions for targeted long-term refinancing transactions much more attractive. The existing bond acquisition programme, worth €20 billion per month, was supplemented by an envelope of €120 billion by the end of the year and a pandemic emergency purchase programme (PEPP) at an initial total of €1,350 billion. Overall, this succeeded in preventing distortions in the financial system and ensuring favourable credit supplies to the public and private sectors.

Following the strong increase due to the coronavirus crisis, risk premiums in the eurozone fell sharply over the course of the year and are currently at approximately the same level as at the beginning of 2020. Returns have also declined generally and in some cases are at new all-time lows. One of the main reasons for the decline in the spreads for euro government bonds since the pandemic broke out was the ECB's significant monetary easing policy, in particular the bond purchase programmes, which reduced the net liquidity available on the market. In addition, the reconstruction assistance planned by the EU strengthened investor confidence in the creditworthiness of the eurozone countries: direct borrowing by the EU, which ensures low-cost financing, is intended to provide grants and loans to the member states. The expectations with regard to the immunisation programmes that have now begun and the anticipated economic recovery were and remain an additional factor in the decline in risk premiums.

Property and casualty insurance and health insurance continue to grow in Austria

Premium revenues in Austrian property and casualty insurance were strong in 2020 with 2.6 per cent growth to €10.2 billion. Health insurance performed even more strongly in 2020 than in the previous year with growth in premiums of 3.9 per cent to €2.4 billion.

However, the trend towards premium attrition continued in life insurance, with premiums shrinking by around 1.4 per cent year-on-year to just under €5.4 billion. The

main reason for this was a decline in life insurance with recurring premiums. These fell by 2.0 per cent to €4.7 billion. Single-premium insurance on the other hand rose by 2.7 per cent to €0.7 billion in 2020.

Pandemic interrupts the catch-up process in Eastern Europe, return to growth expected in 2021 and 2022

Covid-19 resulted in a noticeable decline in economic output of over 4 per cent in the markets of Central and Eastern Europe last year, but experts expect the CEE markets to return to significant economic growth of around 3 to 4 per cent for 2021 and 2022. Based on the positive economic forecasts, the growth advantage currently enjoyed by the CEE markets compared with western European markets should also be established again following the coronavirus pandemic.

The consequences of the pandemic also had an impact on the insurance markets in CEE, with strong premium growth in recent years no longer achieved in the previous year. However, the extent to which the pandemic is affecting the individual countries in the region varies. There are also significant differences in the restrictive measures imposed by local governments to prevent the spread of the virus. However, according to the data currently available, most insurance markets in Central and Eastern Europe show generally stable revenue performance overall, despite the difficult economic conditions in 2020.

Demand for insurance products was higher in the previous year in particular in some segments of property insurance, such as fire insurance, general liability insurance and motor insurance. In contrast, the segment of life insurance saw a marked fall in premiums, following a slight increase here in 2019. In addition to the persistently low interest rate environment, the main reason for this was the decline in new business via bank branches. Many of the financial institutions' offices were closed during the lockdowns and various other restrictions, meaning that the consultation-intensive pensions business could not take place as usual. However, demand for life insurance is generally expected to recover in CEE over the next few years, as there is still a need for private pension provision outside of the state pension systems. Many insurers have also responded to the persistently low interest rates by launching new provision solutions.

CEE remains a region with high growth potential for UNIQA even though the growth of the insurance markets was interrupted over the past year due to the coronavirus.

UNIQA has been active in Central and Eastern Europe for more than 20 years. UNIQA significantly strengthened its market position in this growth region once again with the purchase of the AXA companies in Poland, the Czech Republic and Slovakia at the beginning of 2020. The positive economic performance expected in CEE after the end of the pandemic is expected to contribute towards higher income levels and household consumer spending in the coming years. Increasing prosperity and growing purchasing power go hand in hand with higher demand for insurance solutions.

Premiums per capita (insurance density) as well as the share of the insurance industry in gross domestic product (insurance penetration) in CEE remain well below the average for western European markets, thus clearly demonstrating the very high potential for these insurance markets to catch up.

UNIQA Group

With premiums written including savings portions from unit-linked and index-linked life insurance of €5,565.3 million, the UNIQA Group is among the leading insurance groups in Central and Eastern Europe. The savings portions from unit-linked and index-linked life insurance in the amount of €304.1 million were netted out against the change in insurance provision pursuant to FAS 97 (US GAAP). Without taking the savings portions from unit-linked and index-linked life insurance into consideration, the volume of premiums written amounted to €5,261.2 million.

UNIQA in Europe

UNIQA offers its products and services via all distribution channels (hired sales force, general agencies, brokers, banks and direct sales) and covers virtually the entire range of insurance lines. UNIQA is the second-largest insurance group in Austria, with a presence in 15 countries of the CEE growth region: Albania, Bosnia and Herzegovina, Bulgaria, Croatia, the Czech Republic, Hungary, Kosovo, Montenegro, North Macedonia, Poland, Romania, Russia, Serbia, Slovakia and Ukraine. In addition, insurance companies in Switzerland and Liechtenstein are also part of the UNIQA Group.

The listed holding company UNIQA Insurance Group AG manages the Group and also operates the indirect insurance business concluded as active reinsurance with another insurance company. Moreover, UNIQA Insurance Group AG carries out numerous service functions for UNIQA Österreich Versicherungen AG and its international Group companies, in order to take best advantage of synergy effects and to implement the Group's long-term corporate strategy consistently.

Property and casualty insurance

The property and casualty insurance line includes property insurance for private individuals and companies, as well as private casualty insurance. The UNIQA Group received premiums written in property and casualty insurance in the amount of €3,010.3 million in 2020 (2019: €2,846.8 million) – which is 54.1 per cent (2019: 53.0 per cent) of total premium volume. The largest share by far in the volume of property and casualty insurance comes from private consumer business. Most property and casualty insurance policies are taken out for a limited term of up to three years. A broad spread across the different risks of a great many customers and the relatively short terms of these contracts lead to only moderate capital requirements and also make this business segment attractive as a result.

Health insurance

Health insurance in Austria includes voluntary health insurance for private customers, commercial preventive healthcare and opt-out offers for certain independent professions such as lawyers, architects and chemists. Although health insurance is still at the early stages in CEE, increased levels of prosperity in the region make the long-term growth potential even greater. Across the entire Group, premiums written amounted to €1,167.6 million in 2020 (2019: €1,130.8 million) – or 21.0 per cent (2019: 21.0 per cent) of total premium volume. UNIQA is

the undisputed market leader in this strategically important business line in Austria, with around 46 per cent of market share. The overwhelming majority comes from Austria with around 93 per cent of premiums, with the remaining 7 per cent from international business.

Life insurance

Life insurance covers economic risks that stem from the uncertainty as to how long a customer will live. It includes savings products such as classic and unit-linked life insurance. There are also biometric products which hedge against risks such as occupational disability, long-term care needs or death. The life insurance business model is structured towards the long term with terms that are around 25 years on average. Life insurance is still facing major challenges, as the low interest rate environment is particularly disadvantageous to all long-term forms of saving and investment, including for life insurance. In life insurance, UNIQA achieved a Group-wide premium volume (including savings portions from unit-linked and index-linked life insurance) of €1,387.5 million (2019: €1,394.9 million) – i.e. 24.9 per cent (2019: 26.0 per cent) of total premium volume in 2020.

Companies included in the IFRS consolidated financial statements

In addition to the annual financial statements of UNIQA Insurance Group AG, the consolidated financial statements include the financial statements of all subsidiaries in Austria and abroad as well as those of the investment funds under the Group's control. The basis of consolidation – including UNIQA Insurance Group AG – consisted of 33 Austrian (2019: 33) and 66 international subsidiaries (2019: 57) as well as five Austrian (2019: 6) and six international pension and investment funds (2019: 1). The associates are four Austrian companies (2019: 5) and one international company (2019: 1) that were accounted for using the equity method for the Group accounting.

Details on the consolidated companies and associates are contained in the corresponding overview in the consolidated financial statements. The accounting and measurement methods are also described in the consolidated financial statements.

Error correction in accordance with IAS 8

As a result of a model change in the impairment test, the goodwill allocated to the CGUs Bulgaria and Romania in the 2019 financial year amounts to €54.6 million. The determination of the cash flow in perpetuity and the discount rate is adjusted in the revised impairment test.

Furthermore, in preparation for the initial application of IFRS 17 (Insurance Contracts) which is to be applied from 1 January 2023, it was discovered that deferred profit participation was not accounted for in health insurance. This is being corrected and the same content is also being changed retroactively in the accounting method for life insurance, in order to achieve a uniform presentation. The adjustments are retroactive to 1 January 2019 and have an impact of €9.0 million on the earnings before taxes for the 2019 financial year.

Risk reporting

UNIQA's comprehensive risk report is included in the notes to the 2020 consolidated financial statements.

Corporate Governance Report

Since 2004, UNIQA has pledged to comply with the Austrian Code of Corporate Governance. UNIQA publishes its consolidated Corporate Governance Report at www.uniqagroup.com in the Investor Relations section.

Consolidated non-financial statement, consolidated non-financial report

In accordance with Section 267a (6) of the Austrian Commercial Code, UNIQA Insurance Group AG prepares its consolidated non-financial statement as a separate combined non-financial report. The separate condensed non-financial report is prepared and signed by all legal representatives. It is submitted to the Supervisory Board for review and published together with the Group Management Report pursuant to Section 280 of the Austrian Commercial Code.

UNIQA 3.0

At the end of 2020, the UNIQA Group decided on a far-reaching strategic programme named UNIQA 3.0 for the years 2021 to 2025. Part of this transformation programme involves UNIQA becoming even more customer-focused and making internal processes simpler, more efficient and more cost-effective. This will also be accompanied by the reduction of around 600 employees in Austria by the end of 2022. These measures will therefore result in restructuring expenses in the amount of approximately €99 million in the 2020 consolidated financial statements. In addition, impairments to the goodwill in Serbia, Bulgaria and Romania result in a one-off charge of €106 million.

Group business development

- Premiums written (including savings portions from unit-linked and index-linked life insurance) rose by 3.6 per cent to €5,565.3 million
- The combined ratio deteriorated from 96.4 per cent to 97.8 per cent
- Non-recurring expenses of €205 million for the restructuring provision and impairment losses on goodwill in the fourth quarter of 2020
- Consolidated profit/(loss) due to non-recurring effects of €19.4 million
- Proposed dividend of €0.18 per share for 2020
- Pre-tax profit at 2018 levels expected for 2021

UNIQA Group

In € million

	2020	2019	2018
Premiums written including savings portions from unit-linked and index-linked life insurance	5,565.3	5,372.6	5,309.5
Cost ratio (after reinsurance)	29.4%	27.2%	25.9%
Combined ratio (after reinsurance)	97.8%	96.4%	96.8%
Earnings before taxes	57.1	232.0	294.6
Consolidated profit/(loss) (proportion of the net profit for the period attributable to the shareholders of UNIQA Insurance Group AG)	19.4	171.0	243.3

Changes in premiums

UNIQA's total premium volume, including savings portions from unit-linked and index-linked life insurance in the amount of €304.1 million (2019: €309.8 million), increased by 3.6 per cent to €5,565.3 million in 2020 (2019: €5,372.6 million). The main driver of this was the initial consolidation of AXA CEE companies in the fourth quarter of 2020. Details on the acquisition of the AXA companies can be found in note 1 to the consolidated financial statements.

Premiums written including savings portions from unit-linked and index-linked life insurance

In € million

The premium volume fell slightly overall compared with the previous year due to the coronavirus pandemic after adjusting the premiums from the AXA companies acquired. Slight declines in premiums in property and casualty insurance were recorded in the maritime, aeronautical and transportation insurance business lines as well as other insurance policies due to the coronavirus. No Covid-19-related

effects were observed in the health and life insurance business areas.

In the area of insurance policies against recurring premium payments, there was a pleasant increase of 3.9 per cent to €5,472.2 million (2019: €5,267.9 million). In the area of the single premium business, however, the premium volume fell by 10.9 per cent to €93.2 million (2019: €104.6 million) in line with the strategy.

Premiums written in property and casualty insurance grew by 5.7 per cent to €3,010.3 million in 2020 (2019: €2,846.8 million). In health insurance, premiums written in the reporting period increased by 3.2 per cent to €1,167.6 million (2019: €1,130.8 million). In life insurance, premiums written including savings portions from unit-linked and index-linked life insurance fell overall by 0.5 per cent to €1,387.5 million (2019: €1,394.9 million). One of the reasons for this was the subdued demand due to low interest rates and the temporary closure of our partner banking branches during the lockdown phases in 2020, especially in CEE.

The Group premiums earned, including savings portions from unit-linked and index-linked life insurance (after reinsurance) in the amount of €304.1 million

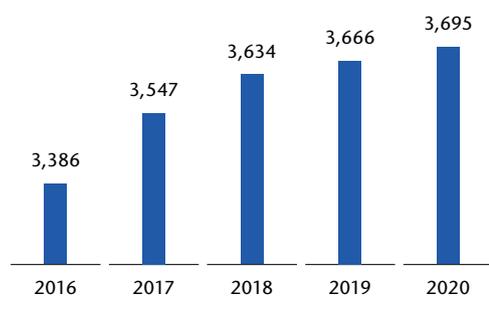

(2019: €309.8 million), rose by 3.1 per cent to €5,333.7 million (2019: €5,170.8 million). The volume of premiums earned (net, in accordance with IFRSs) even grew by 3.5 per cent to €5,029.5 million (2019: €4,861.1 million).

Change in insurance benefits

Insurance benefits before reinsurance (see note 9 in the consolidated financial statements) increased in the 2020 financial year by 1.4 per cent to €3,819.8 million (2019: €3,765.3 million). Consolidated insurance benefits (net) rose less strongly than the volume of premiums earned in the past year by 0.8 per cent to €3,694.6 million (2019: €3,666.1 million).

Insurance benefits (net)

In € million

In 2020 despite the extraordinary charges associated with the Covid-19 pandemic, the loss ratio after reinsurance in property and casualty insurance fell to 63.2 per cent (2019: 64.2 per cent) due to a favourable trend in basic losses. An additional loss was incurred of around €70 million mainly from the area of business interruption insurance in direct connection with Covid-19. This was counteracted

by lower expenses for motor vehicle insurance due to lower mobility in 2020. However, the combined ratio after reinsurance deteriorated to 97.8 per cent (2019: 96.4 per cent) due to the higher cost ratio at Group level.

Combined ratio after reinsurance

In per cent

Operating expenses

Total consolidated operating expenses (see note 10 in the consolidated financial statements) less reinsurance commission and share of profit from reinsurance ceded rose by 11.3 per cent to €1,566.4 million in the 2020 financial year (2019: €1,407.1 million). Expenses for the acquisition of insurance less reinsurance commission received and the share of profit from reinsurance ceded in the amount of €18.5 million (2019: €17.9 million) increased slightly less than the volume of premiums earned, by 3.0 per cent to €934.9 million (2019: €907.4 million). Other operating expenses rose by 26.4 per cent to €631.5 million (2019: €499.7 million) due to higher personnel and IT costs in connection with the integration of the AXA companies in CEE in the amount of €39 million and one-off restructuring expenses of €99 million. This includes expenses amounting to around €62 million (2019: around €51 million) as part of the innovation and investment programme.

The cost ratio after reinsurance, i.e. the ratio of total operating expenses less the amounts received from reinsurance commission and share of profit from reinsurance ceded to the Group premiums earned, including savings portions from unit-linked and index-linked life insurance, increased to 29.4 per cent during the

past year (2019: 27.2 per cent) as a result of the developments mentioned above. The cost ratio before reinsurance rose to 28.6 per cent (2019: 26.7 per cent).

Investments

The UNIQA Group's investment portfolio (including investment property, financial assets accounted for using the equity method and other investments) rose by €1,694.4 million to €22,319.2 million in the 2020 financial year (31 December 2019: €20,624.8 million). The main reason for this was the first-time inclusion of the capital investment portfolio of the AXA-CEE companies.

Net investment income fell to €505.4 million (2019: €585.2 million). The reasons for this were losses in the value of shares, fixed-income securities and equity investments. In addition, gains realised from the sale of properties of around €46 million had a positive impact in 2019. No significant gains from the sale of properties were recorded in 2020. Currency effects amounting to around €15.7 million also had a negative effect on net investment income. In addition, the equity method accounting of the 14.3 per cent holding in STRABAG SE in 2020 resulted in a positive contribution to earnings of €56.0 million (2019: €57.4 million). A detailed description of net investment income can be found in the consolidated financial statements (see note 5 in the consolidated financial statements).

Net investment income declined compared with the previous year due to negative capital market developments as a result of the coronavirus pandemic. However, an upward trend was observed in the capital markets from the second quarter of 2020. Any reversals of impairment losses were recognised in other comprehensive income in the item "Profits recognised in equity from the measurement of financial instruments available for sale".

Other income and other expenses

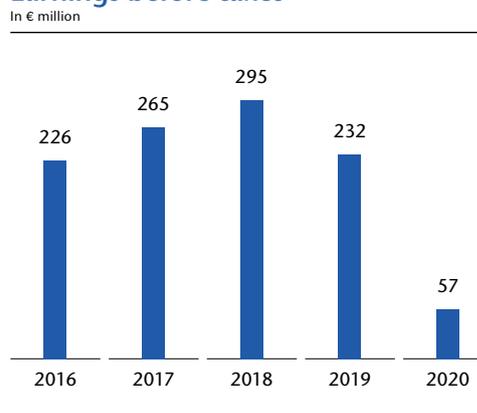

Other income rose by 12.6 per cent in 2020 to €216.5 million (2019: €192.4 million). Other expenses rose by 20.7 per cent to €230.5 million in the reporting period (2019: €191.0 million).

Results

The UNIQA Group's technical result fell in 2020 by 13.5 per cent to €78.3 million (2019: €90.5 million) as a result of the increased cost burden from one-off expenses. Operating profit fell by 28.4 per cent to €247.6 million (2019: €345.9 million).

UNIQA's earnings before taxes fell by 75.4 per cent to €57.1 million (2019: €232.0 million), primarily due to the one-off restructuring provision and impairment of goodwill. Profit/(loss) for the year also fell by 86.1 per cent to €24.3 million (2019: €175.1 million). Income tax expense fell to €32.8 million in 2020 (2019: €57.0 million).

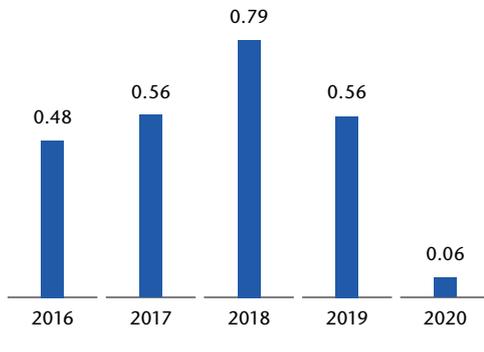

Earnings before taxes

The consolidated profit/(loss) (i.e. proportion of the net profit for the period attributable to the shareholders of UNIQA Insurance Group AG) amounted to €19.4 million (2019: €171.0 million). Earnings per share fell as a result to €0.06 (2019: €0.56).

Earnings per share

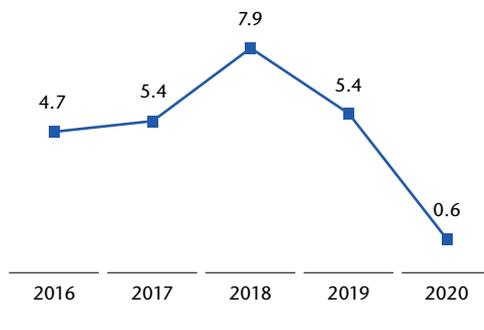

In €

The return on equity (after taxes and non-controlling interests) fell to 0.6 per cent in the reporting period (2019: 5.4 per cent).

Own funds and total assets

Total equity attributable to the shareholders of UNIQA Insurance Group AG increased by €82.4 million to €3,450.1 million in the past financial year (31 December 2019: €3,367.7 million). This was due to the increased measurement of financial instruments available for sale caused by the general fall in interest rates. Non-controlling interests came to €24.8 million (31 December 2019: €19.4 million). The Group's total assets came to €31,908.0 million as at 31 December 2020 (31 December 2019: €28,673.8 million).

Cash flow

UNIQA's net cash flow from operating activities amounted to €167.9 million in 2020 (2019: €519.9 million). Cash flow from investment activities amounted to €-714.7 million (2019: €-526.9 million). Net cash flows from financing activities amounted to €712.8 million as a result of the issuance of two bonds (2019: €-958.9 million). Overall, cash and cash equivalents increased by €161.1 million to €640.7 million in the 2020 financial year (2019: €479.6 million).

Employees

UNIQA's average number of employees (full-time equivalents, FTEs) rose in 2020 to 13,408 (2019: 13,038) due to the inclusion of the AXA-CEE companies. These included 4,138 (2019: 4,202) field sales employees. The number of employees in administration amounted to 9,271 (2019: 8,836).

In 2020, the Group had an average of 3,231 FTEs (2019: 2,766) in the Central Europe (CE) region – Poland, Slovakia, the Czech Republic and Hungary – as well as 2,285 FTEs (2019: 2,278) in the Southeastern Europe (SEE) region – Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Kosovo, Montenegro, North Macedonia and Serbia – and 1,622 FTEs (2019: 1,647) in the Eastern Europe (EE) region – Romania and Ukraine. There were 103 FTEs (2019: 112) working in Russia (RU). The average number of FTEs in the Western European markets in 2020 was 42 (2019: 42). A total of 6,125 FTEs were employed in Austria (2019: 6,193). Including the employees of the general agencies working exclusively for UNIQA, the total number of people working for the Group amounts to around 23,500.

In 2020, 60 per cent of the staff working in administrative positions at UNIQA in Austria were women (2019:

55 per cent). In sales the ratio was 80 per cent men to 20 per cent women (2019: 82 per cent men to 18 per cent women). 24.6 per cent (2019: 15.4 per cent) of employees were working part time. The average age in the past year was 44.5 years (2019: 44 years).

There was no bonus for managers or selected key employees nor was there any employee participation in the 2020 financial year due to the coronavirus pandemic.

In addition, UNIQA offers young people in training the opportunity to get to know foreign cultures and make international contacts. Currently 93 apprentices are being trained.

Changes in premiums

At UNIQA Austria, premiums written including savings portions from unit-linked and index-linked life insurance increased by 1.0 per cent to €3,837.5 million in 2020 (2019: €3,800.8 million). Recurring premiums rose by 0.8 per cent to €3,807.7 million (2019: €3,775.7 million). The single premium business increased by 18.6 per cent to €29.8 million (2019: €25.1 million).

Including savings portions from unit-linked and index-linked life insurance, the volume of premiums earned at UNIQA Austria amounted to €3,076.7 million

(2019: €3,057.0 million). The volume of premiums earned (net, in accordance with IFRSs) rose by 0.9 per cent to €2,869.7 million in 2020 (2019: €2,845.4 million).

While premiums written in property and casualty insurance rose by 2.0 per cent to €1,796.1 million (2019: €1,760.7 million), they increased by as much as 3.2 per cent in health insurance to €1,089.6 million (2019: €1,056.3 million). In life insurance (including savings portions from unit-linked and index-linked life insurance), they fell by 3.3 per cent to €951.8 million (2019: €983.9 million).

Premiums written including savings portions from unit-linked and index-linked life insurance

UNIQA Austria

In € million

Premiums earned (net, according to IFRSs) rose by 1.5 per cent to €1,066.1 million in property and casualty insurance (2019: €1,049.8 million) and by 3.1 per cent to €1,082.7 million in health insurance (2019: €1,050.6 million). However, in life insurance they fell by 3.2 per cent to €720.9 million (2019: €744.9 million). Including savings portions from unit-linked and index-linked life insurance, the volume of premiums earned in life insurance amounted to €927.9 million (2019: €956.6 million).

Changes in insurance benefits

Net insurance benefits at UNIQA Austria fell by 1.8 per cent in 2020 to €2,383.7 million (2019: €2,426.3 million). In property and casualty insurance, they rose by 1.5 per cent to €698.6 million (2019: €688.3 million) in line with premiums earned. As a result, the loss ratio in property and casualty insurance fell slightly in 2020 to 65.5 per cent (2019: 65.6 per cent). Nevertheless, the combined ratio in the UNIQA Austria segment increased after reinsurance to 98.7 per cent (2019: 93.9 per cent) due to the higher cost ratio. In health insurance, net insurance benefits fell by 1.2 per cent to €916.9 million (2019: €927.8 million).

In life insurance, they fell by 5.2 per cent to €768.2 million (2019: €810.3 million).

Operating expenses

Operating expenses less reinsurance commissions received and the share of profit from reinsurance ceded in the amount of €194.3 million (2019: €190.5 million) increased by 13.2 per cent to €719.3 million (2019: €635.7 million) in the 2020 financial year due to the one-off expenses related to the restructuring. They rose by 18.9 per cent in property and casualty insurance to €353.7 million (2019: €297.4 million). In health insurance, they also grew 15.3 per cent to reach €176.9 million (2019: €153.3 million). They also increased in life insurance by 2.0 per cent to €188.8 million (2019: €185.1 million).

The cost ratio of UNIQA Austria after reinsurance, i.e. the ratio of total operating expenses, less reinsurance commission and share of profit from reinsurance ceded, to premiums earned, including savings portions from unit-linked and index-linked life insurance, thus rose to 23.4 per cent during the past year (2019: 20.8 per cent).

Net investment income

In the UNIQA Austria segment, net investment income fell by 62.1 per cent in 2020 to €160.8 million (2019: €424.1 million). The main reason for this development was the merger of UNIQA International AG with UNIQA Österreich Versicherungen AG. Through the merger, measurements of international insurance companies, that have been performed internally until now, are represented across the UNIQA Austria and UNIQA International segments. However, this negative measurement result is balanced out by the consolidation and therefore had no effect on profit or loss for the UNIQA Group.

Changes in premiums

Premiums written including savings portions from unit-linked and index-linked life insurance increased in the UNIQA International segment in 2020 by 9.2 per cent to €1,705.4 million (2019: €1,561.2 million) as a result of the acquisition of AXA companies in Poland, the Czech Republic and Slovakia. While recurring premiums increased by 10.8 per cent to €1,642.1 million (2019: €1,481.8 million), single premiums fell as planned by 20.3 per cent to €63.4 million (2019: €79.5 million). That means that in 2020 the international companies contributed a total of 30.6 per cent (2019: 29.1 per cent) to total Group premiums.

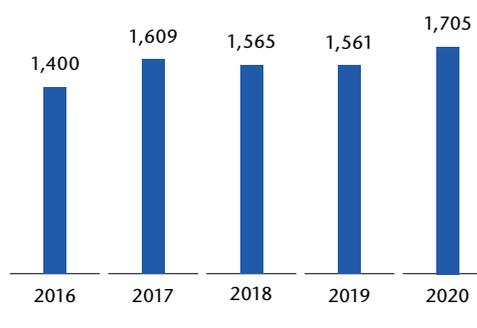

Including savings portions from unit-linked and index-linked life insurance, the segment's volume of premiums earned amounted to €1,200.5 million (2019: €1,082.6 million). The volume of premiums earned (net, in accordance with IFRSs) increased in 2020 by 12.1 per cent to €1,103.4 million (2019: €984.5 million).

While premiums written grew in property and casualty insurance by 10.7 per cent to €1,192.6 million (2019: €1,076.9 million), they rose by 4.5 per cent to €77.9 million in health insurance (2019: €74.6 million). In life insurance, premiums written (including savings portions from unit-linked and index-linked life insurance) rose by 6.1 per cent to €434.9 million (2019: €409.8 million).

AXA-CEE companies (2019: €943.7 million). In Eastern Europe (EE), comprising Romania and Ukraine, they fell by 4.1 per cent to €193.1 million (2019: €201.5 million). In Southeastern Europe (SEE), comprising Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Kosovo, Montenegro, North Macedonia and Serbia, the premiums written including savings portions from unit-linked and index-linked life insurance fell in 2020 by 9.4 per cent to €289.5 million (2019: €319.4 million). In Russia (RU), they fell by 19.3 per cent to €71.4 million (2019: €88.5 million). They remained stable in Western Europe (WE) – Liechtenstein and Switzerland – at €8.0 million (2019: €8.1 million).

Changes in insurance benefits

Net insurance benefits at UNIQA International increased in 2020 by 12.3 per cent to €608.1 million (2019: €541.6 million). They rose by 11.1 per cent in property and casualty insurance to €386.2 million (2019: €347.6 million). In health insurance, they grew 8.6 per cent to reach €42.2 million (2019: €38.8 million). In life insurance, they also increased by 15.9 per cent to €179.8 million (2019: €155.1 million). This pushed the loss ratio in property and casualty insurance down to 55.0 per cent in 2020 (2019: 56.6 per cent), while the combined ratio after reinsurance in the UNIQA International segment improved to 93.3 per cent (2019: 95.0 per cent).

In the Central Europe region, insurance benefits rose by 33.8 per cent in 2020 to €372.5 million (2019: €278.4 million), while in the Eastern Europe region, they increased by 14.5 per cent to €63.7 million (2019: €55.6 million). In Southeastern Europe, they decreased by 15.9 per cent to €115.6 million (2019: €137.5 million). At €54.9 million,

benefits in Russia were 20.6 per cent below the previous year's level (2019: €69.2 million). In Western Europe, they rose to €1.3 million (2019: €0.8 million).

Operating expenses

Operating expenses less reinsurance commissions received and the share of profit from reinsurance ceded in the amount of €129.2 million (2019: €133.0 million) increased in the 2020 financial year by 12.4 per cent to €466.4 million (2019: €414.9 million).

They rose 14.3 per cent in property and casualty insurance to €269.4 million (2019: €235.7 million), while in health insurance they rose by 28.4 per cent to €27.4 million (2019: €21.3 million). In life insurance, they increased by 7.4 per cent to €169.6 million (2019: €157.9 million).

The cost ratio of UNIQA International after reinsurance, i.e. the ratio of total operating expenses, less reinsurance commission and share of profit from reinsurance ceded, to premiums earned, including savings portions from unit-linked and index-linked life insurance, amounted to 38.8 per cent during the past year (2019: 38.3 per cent).

In Central Europe, operating expenses less reinsurance commissions received and the share of profit from reinsurance ceded rose by 34.6 per cent to €256.9 million (2019: €190.9 million) in the reporting period. In Eastern Europe, they fell by 17.0 per cent to €69.3 million (2019: €83.5 million). They remained stable in Southeastern Europe at €101.5 million (2019: €101.3 million). In Russia, costs fell by 18.4 per cent to €13.4 million (2019: €16.4 million), while in Western Europe they also dropped by 32.4 per cent to €1.4 million (2019: €2.1 million). In administration (UNIQA International AG), costs rose by 15.4 per cent to €23.8 million (2019: €20.7 million).

In the Consolidation segment, net investment income amounted to €135.4 million in 2020 (2019: €-286.2 million).

Earnings before taxes amounted to €193.4 million (2019: €-232.1 million).

Significant events after the reporting date

In early March 2021, the Austrian Supreme Court ruled in favour of the insurance industry in connection with business interruptions arising from Covid-19. In this decision, the Court clarified that a coverage obligation on the part of the insurer from the business interruption caused by the epidemic only applies in the case of a business closed due to the Austrian Epidemic Act, but not based on a ban on entry and access ordered under the Austrian Covid-19 Measures Act. This is expected to have a positive impact on claim payments in the 2021 financial year.

Outlook

The ongoing Covid-19 pandemic considerably increases the uncertainty of all statements on future business development, as not only all forecasts regarding the further course of the pandemic and the associated effects on overall economic development, but also the assessment of future central bank policy, government measures, and reactions on the capital market are currently subject to major uncertainty.

On the other hand, we regard the situation in our technical core business as relatively strong. Despite our initial fears at the start of the pandemic, our insurance business has proven to be highly resilient. Despite significant restrictions, which affected sales in particular, we were able to keep our premium volume relatively stable on a comparable basis, i.e. before factoring in the AXA acquisition in CEE. Our customers did not waive their insurance coverage despite the economic challenges, meaning that the rate of cancellations remained very moderate for the given conditions. This makes us optimistic about the premium volume for 2021.

The loss directly related to Covid-19 was already entered in the books in full in 2020 and will certainly not be repeated to the same extent in 2021. Conversely, people's mobility in our core markets is no longer as reduced as the levels we saw in the first half of 2020, despite recent repeated lockdowns. Thus, we cannot expect fewer claims in our motor vehicle insurance over the long term.

We began the largest restructuring in our corporate history in the past financial year. The first partial successes of this restructuring should be seen in the form of a decrease in administrative costs as early as 2021.

In summary, we do not see any significant distortions in our core insurance business despite the ongoing pandemic. This expectation is, however, linked to the hope of improvements in the pandemic situation thanks to the broad availability of effective vaccines in the second half of 2020.

The outlook for the UNIQA Group for 2021 is subject to the following assumptions:

- A global economic recovery is occurring that balances out at least some of the economic output lost in 2020.
- The ECB's monetary policy will also remain extremely loose in 2021. UNIQA does not therefore expect any noticeable rise in the general interest rate level in the eurozone.
- Fluctuations on the capital markets remain high, but there is no lasting significant decline in securities prices.
- There are no drastic fiscal, regulatory or legal interventions on the horizon.
- Damages from natural catastrophes remain within the average of previous years.

Overall, UNIQA is expecting earnings before taxes for the 2021 financial year at approximately the 2018 level.

The dividend distribution is based on the company's profits. UNIQA plans to distribute 50 to 60 per cent of consolidated profit to shareholders in the form of a dividend.

Information pursuant to Section 243a(1) of the Austrian Commercial Code

1. The share capital of UNIQA Insurance Group AG amounts to €309,000,000 and is comprised of 309,000,000 individual no-par-value bearer shares. €285,356,365 of the share capital was fully paid in cash and €23,643,635 was paid in non-cash contributions. All shares confer the same rights and obligations.
2. A voting trust exists for shareholdings of UNIQA Versicherungsverein Privatstiftung, Austria Versicherungsverein Beteiligungs-Verwaltungs GmbH, Collegialität Versicherungsverein Privatstiftung and RZB Versicherungsbeteiligung GmbH. Reciprocal purchase option rights have been agreed upon.
3. Raiffeisen Bank International AG holds indirectly, via RZB – BLS Holding GmbH and RZB Versicherungsbeteiligung GmbH, a total of 10.87 per cent (allocated in accordance with the Austrian Stock Exchange Act) of the company's share capital; UNIQA Versicherungsverein Privatstiftung holds directly and indirectly through Austria Versicherungsverein Beteiligungs-Verwaltungs GmbH a total of 49.00 per cent (allocated in accordance with the Austrian Stock Exchange Act) of the company's share capital.
4. No shares with special control rights have been issued.
5. The employees who have share capital exercise their voting rights directly.
6. There are no provisions of the Articles of Association or other provisions that go beyond the statutory provisions for appointing Management Board and Supervisory Board members or for modifying the Articles of Association, with the exception of the rule that, when a Supervisory Board member turns 70 years of age, they retire from the Supervisory Board at the end of the next Annual General Meeting.
7. The Management Board is authorised to increase the company's equity capital up to and including 30 June 2024 with the approval of the Supervisory Board by a total of no more than €80,000,000 by issuing up to 80,000,000 no-par-value bearer or registered shares

conferring voting rights in exchange for payment in cash or in kind, one time or several times. The Management Board is further authorised until 30 May 2023 to buy back up to 30,900,000 treasury shares (together with other treasury shares that the company has already acquired and still possesses) through the company and/or through subsidiaries of the company (Section 66 of the Stock Corporation Act). The company held 2,034,739 treasury shares as at 31 December 2020. 1,215,089 treasury shares are held through UNIQA Österreich Versicherungen AG. This share portfolio resulted from the merger in 2016 of BL Syndikat Beteiligungs Gesellschaft m.b.H. as the transferring company, with UNIQA Insurance Group AG as acquiring company (payment of portfolio in UNIQA shares to shareholders of BL Syndikat Beteiligungs Gesellschaft m.b.H.). This share portfolio is not to be included in the highest number of treasury shares.

8. Corresponding agreements with other shareholders of STRABAG SE are in place concerning the holding in this company.
9. No reimbursement agreements exist for the event of a public takeover offer.

Information pursuant to Section 243a(2) of the Austrian Commercial Code

The internal control and risk management system at UNIQA Insurance Group AG is comprised of transparent systems that encompass all company activities and include a systematic and permanent approach, based on a defined risk strategy, with the following elements: identification, analysis, measurement, management, documentation and communication of risks, as well as the monitoring of these activities. Identification, analysis, measurement, management, documentation and communication of risks and monitoring of these activities. The scope and orientation of these systems were designed on the basis of company-specific requirements. Despite creating appropriate frameworks, there is always a certain residual risk because even appropriate and functional systems cannot guarantee absolute security with regard to the identification and management of risks.

Objectives:

- a) Identification and measurement of risks that could obstruct the goal of producing (consolidated) financial statements that comply with regulations

- b) Limiting recognised risks, for example by consulting with external specialists
- c) Review of external risks with regard to their influence on the consolidated financial statements and the corresponding reporting of these risks

The aim of the internal control system in the accounting process is to guarantee sufficient security by means of implementing controls so that, despite identified risks, proper financial statements are prepared. Along with the risks described in the Risk Report, the risk management system also analyses additional risks within internal business processes, compliance, internal reporting, etc.

Organisational structure and control environment

The company's accounting process is incorporated into the UNIQA Group accounting process. In addition to the SAP S/4HANA accounting system, a harmonised insurance-specific IT system is also used for the company's purposes. Compliance guidelines and manuals for company organisation, accounting and consolidation exist for the purpose of guaranteeing secure processes.

Identification and control of risks

An inventory and appropriate control measures were conducted to identify existing risks. The type of controls was defined in the guidelines and instructions and coordinated with the existing authorisation concept.

The controls include both manual coordination and comparison routines, as well as the acceptance of system configurations for connected IT systems. New risks and control weaknesses in the accounting process are quickly reported to management so that it can undertake corrective measures. The procedure for the identification and control of risks is evaluated on a regular basis by an external independent auditor.

Information and communication

Deviations from expected results and evaluations are monitored by means of monthly reports and key figures, and they form the foundation of information provided to management on an ongoing basis. The management review that is based on this information, and the approval of the processed data, form the foundation of further treatment in the company's financial statements.

Measures to ensure effectiveness

Rather than being made up of static systems, the internal control and risk management system is adjusted on an ongoing basis to changing requirements and the business environment. The identification of the necessity of changes requires constant monitoring of the effectiveness of all systems. The foundations for this are:

- a) Regular self-evaluations by the persons tasked with controls
- b) Evaluations of key data to validate transaction results in relation to indications that suggest control deficiencies
- c) Random tests of effectiveness by the Internal Audit department and comprehensive efficacy tests by the Internal Audit department and/or special teams

Reporting to the Supervisory Board/ Audit Committee

In the context of compliance and internal control and risk management systems, the Management Board reports regularly to the Supervisory Board and the Audit Committee by means of Internal Audit department reports and the separate engagement of external auditors.

Proposed appropriation of profit

The separate financial statements of UNIQA Insurance Group AG prepared in accordance with the Austrian Commercial Code and the Insurance Supervision Act show a net profit of €€55,722,592.34 (2019: €168,233,424.34) for the 2020 financial year. The Management Board will propose to the Annual General Meeting on 31 May 2021 that this profit be used for the distribution of a dividend of €0.18 for each of the 309,000,000 entitled no-par-value bearer shares issued as of the reporting date and to carry the remaining amount forward to new account.

Consolidated Financial Statements

General information

UNIQA Insurance Group AG (UNIQA) is a company domiciled in Austria. The address of the company's registered office is Untere Donaustrasse 21, 1029 Vienna, Austria. The Group primarily conducts business with property and casualty, as well as health and life insurance.

UNIQA Insurance Group AG is registered in the company registry of the Commercial Court of Vienna under FN 92933t. The shares of UNIQA Insurance Group AG are listed on the prime market segment of the Vienna Stock Exchange.

UNIQA Insurance Group AG is subject to the regulatory requirements of European and Austrian supervisory authorities (Financial Market Authority, European Insurance and Occupational Pensions Authority). The requirements include in particular the quantitative and qualitative solvency requirements.

Unless otherwise stated, these consolidated financial statements are prepared in thousand euros; rounding differences may occur through the use of automated calculation tools when totalling rounded amounts and percentages. The functional currency at UNIQA is the euro.

UNIQA's reporting date is 31 December.

Accounting principles

The consolidated financial statements were prepared in line with the International Financial Reporting Standards (IFRSs) as well as the provisions of the International

Financial Reporting Interpretations Committee (IFRIC) as adopted by the European Union (EU) as at the reporting date. The additional requirements of Section 245a(1) of the Austrian Commercial Code and Section 138(8) of the Austrian Insurance Supervision Act were met.

Use of discretionary decisions and estimates

The consolidated financial statements require the Group Management Board to make discretionary decisions, estimates and assumptions that relate to the application of accounting policies and the amounts stated for the assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and their underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recorded prospectively.

Discretionary judgements and assumptions regarding the future which could have a significant impact on these consolidated financial statements are described in the following notes:

Note 2: Investment property (assumptions used in determining fair values)

Note 3: Financial assets accounted for using the equity method (assumptions and models used in STRABAG SE's earnings estimates)

Note 4: Other investments and unit-linked and index-linked life insurance investments (determination of fair values)

Note 6: Technical provisions (assumptions and models used in calculating actuarial provisions)

Note 12: Intangible assets (assumptions used in determining goodwill)

Note 17: Defined benefit plans (calculation of the present value of the defined benefit obligations)

Note 16: Deferred taxes (assessment of the ability to realise deferred tax assets)

The following table provides a summary of the measurement standards for the individual balance sheet items in the assets and liabilities:

Balance sheet item	Standard of measurement
Assets	
Property, plant and equipment	At lower of amortised cost or recoverable amount
Intangible assets	
- with determinable useful life	At lower of amortised cost or recoverable amount
- with indeterminable useful life	At lower of acquisition cost or recoverable amount
Investments	
Investment property	At lower of amortised cost or recoverable amount
Financial assets accounted for using the equity method	At lower of amortised pro-rata value of the equity or recoverable amount
Other investments	
- Financial assets at fair value through profit or loss	Fair value
- Financial assets held for sale	Fair value
- Loans and receivables	Amortised cost
Unit-linked and index-linked life insurance investments	Fair value
Reinsurers' share of technical provisions	As per the measurement of technical provisions
Reinsurers' share of technical provisions for unit-linked and index-linked life insurance	As per the measurement of technical provisions
Receivables, including insurance receivables	Amortised cost
Income tax receivables	At the amount of any expected claims to the tax authorities, based on the tax rates applicable on the reporting date or in the near future
Deferred tax assets	Undiscounted measurement applying the tax rates that are expected for the period in which an asset is realised or a liability met
Cash and cash equivalents	Amortised cost
Assets in disposal groups held for sale	Lower of carrying amount and fair value less cost to sale
Liabilities	
Subordinated liabilities	Amortised cost
Technical provisions	Property insurance: provisions for losses and unsettled claims (undiscounted value of expected future payment obligations) Life and health insurance: insurance provision in accordance with actuarial calculation principles (discounted value of expected future benefits less premiums)
Technical provisions for unit-linked and index-linked life insurance	Insurance provision based on the change in value of the contributions assessed
Financial liabilities	
- Liabilities from loans	Amortised cost
- Derivative financial instruments	Fair value
Other provisions	
- from defined benefit obligations	Actuarial measurement applying the projected benefit obligation method
- other	Present value of future settlement value
Liabilities and other items classified as liabilities	Amortised cost
Income tax liabilities	At the amount of any obligations to the tax authorities, based on the tax rates applicable on the reporting date or in the near future
Deferred tax liabilities	Undiscounted measurement applying the tax rates that are expected for the period in which an asset is realised or a liability met

Notes to the Consolidated Financial Statements

Segment reporting

The accounting and measurement methods of the segments that are subject to mandatory reporting correspond with the consolidated accounting and measurement methods. The earnings before taxes for the segments were determined taking the following components into consideration: summation of the IFRS profits in the individual companies, taking the elimination of net investment income in the various segments and impairment of goodwill into consideration. All other consolidation effects (profit/(loss) for the period at associates, elimination of interim results, and other overall effects) are included in "Consolidation". The segment profit/(loss) obtained in this manner is reported to the Management Board of UNIQA Insurance Group AG to manage the Group in the following operating segments:

UNIQA Austria – includes the Austrian insurance business.

UNIQA International – includes all international primary insurance companies and an international service company as well as investment management companies and

pension funds. This segment is divided on a regional basis into the following main areas:

- Central Europe (CE – Poland, Slovakia, the Czech Republic and Hungary)
- Eastern Europe (EE – Romania and Ukraine)
- Russia (RU)
- Southeastern Europe (SEE – Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Kosovo, Montenegro, North Macedonia and Serbia)
- Western Europe (WE – Liechtenstein and Switzerland)
- Administration

Reinsurance – includes UNIQA Re AG (Zurich, Switzerland) and the reinsurance business of UNIQA Insurance Group AG.

Group functions – includes the remaining items for UNIQA Insurance Group AG (net investment income and administrative costs) as well as all other remaining Austrian and international service companies.

The amounts indicated for each business line have been adjusted to eliminate amounts resulting from internal transactions. Therefore, the balance of business line assets

and business line liabilities does not allow conclusions to be drawn with regard to the equity allocated to the respective segment.

Business combinations

If the Group has obtained control, it accounts for business combinations in line with the acquisition method. The consideration transferred for the acquisition and the identifiable net assets acquired are measured at fair value. Transaction costs are recognised as expenses immediately.

1. Acquisition of AXA companies

On 7 February 2020, UNIQA Österreich Versicherungen AG agreed with AXA S.A. and its subsidiary Société Beaujon on the acquisition of shares in the AXA subsidiaries and branches in Poland, the Czech Republic and Slovakia.

The closing took place on 15 October 2020 through the transfer of the shares, by which control over the acquired companies was obtained. Prior to this, approval was obtained from the EU Commission and the supervisory authorities in the countries concerned.

Both life and non-life insurance companies were acquired, as well as investment management companies, pension funds and service companies, each constituting a business operation within the meaning of IFRS 3. The acquisition of the companies implements UNIQA's strategy of further growth in countries where UNIQA is already represented.

AXA companies in Poland

UNIQA acquired 93.42 per cent of the issued share capital of the life insurance company AXA Życie Towarzystwo Ubezpieczeń S.A. from Société Beaujon and 6.58 per cent from AXA S.A. AXA Życie Towarzystwo Ubezpieczeń S.A. holds all shares in the service company AXA Polska S.A. and in the investment fund AXA Towarzystwo Funduszy Inwestycyjnych S.A.

AXA Ubezpieczenia Towarzystwo Ubezpieczeń i Reasekuracji S.A. is a non-life insurance company with its registered office in Warsaw, in which UNIQA acquired 100 per cent of the issued share capital from Société Beaujon.

AXA Powszechnie Towarzystwo Emerytalne S.A. is a pension fund in which UNIQA acquired 100 per cent of the issued share capital from Société Beaujon.

AXA companies in the Czech Republic

AXA pojišťovna a.s. is a non-life insurance company in which UNIQA acquired 100 per cent of the issued share capital from Société Beaujon.

AXA životní pojišťovna a.s. is a life insurance company in which UNIQA also acquired 100 per cent of the issued share capital from Société Beaujon.

In turn, this company holds all shares in the investment management company AXA investiční společnost a.s., in the service company AXA Management Services s.r.o. and in the two Slovakian pension funds AXA d.d.s., a.s. and AXA d.s.s., a.s.

Finally, 99.98 per cent of the issued share capital in AXA penzijní společnost a.s., a Czech pension fund, was acquired from Sociétés Beaujon.

AXA companies in Slovakia

The two companies AXA d.d.s., a.s. and AXA d.s.s., a.s., held by the Czech AXA životní pojišťovna a.s. are pension funds with their registered offices in Slovakia.

The amounts recognised at fair value for the identifiable assets acquired and the liabilities assumed are shown in the table below.

Assets and liabilities from business combinations at acquisition date

In € thousand

Property, plant and equipment	32,742
Intangible assets	353,176
Investments	1,309,405
Unit-linked and index-linked life insurance investments	879,536
Reinsurers' share of technical provisions	180,086
Deferred tax assets	17,250
Receivables, including insurance receivables	117,148
Income tax receivables	2,112
Cash and cash equivalents	31,202
Total assets	2,922,657
Technical provisions	981,152
Technical provisions for unit-linked and index-linked life insurance	817,239
Other provisions	26,856
Deferred tax liabilities	36,118
Financial liabilities	30,739
Liabilities and other items classified as liabilities	232,147
Income tax liabilities	19,753
Total liabilities	2,144,004
Net identifiable assets acquired	778,653

Consideration transferred

In € thousand

Contractually agreed purchase price	1,002,000
Adjustments to the sale price	-3,670
Price paid¹⁾	998,330
Acquired bank balances	-31,202
Consideration transferred less acquired bank balances	967,128

¹⁾ The purchase price was paid in full by cash transfer.

Preliminary differential amount

In € thousand

Consideration transferred	998,330
Net identifiable assets acquired at fair value	778,653
Preliminary differential amount	219,677

The calculations include the knowledge gained in the period between obtaining control on 15 October 2020 until the preparation of these consolidated financial statements. In particular in the area of technical provisions it is possible that subsequent adjustments may be made once a full insight into the parameters of the portfolios relevant to the calculation is available.

The goodwill resulting from the acquisition in the amount of €219,767 thousand reflects the value of synergies anticipated in connection with the acquisition (market positioning, potential addition of new customers, savings in administrative processes and infrastructures). The allocation of the difference is based on the acquired identifiable net asset values attributable to the respective CGUs and taking into account future synergies. Accordingly, €15.8 million of the difference is allocated to the CGU Poland and €203.9 million to the CGU Czech Republic.

Goodwill is deductible for income tax purposes.

The fair value of the receivables acquired amounts to €117,148 thousand. At the time of acquisition, the gross contract value amounts to €182,182 thousand. The balance of value adjustments at the acquisition date thus amounts to €65,034 thousand.

To finance the acquisition, a senior bond in the amount of €600 million was issued at an issue price of 99.436 per cent of the nominal amount (see Chapter “Financial liabilities”) in July 2020.

The acquisition-related costs (mainly reported under operating expenses) amount to €12,083 thousand.

For the period between the date of acquisition and the reporting date, the acquisition contributed €211,881 thousand to the premiums written and €1,654 thousand to UNIQA’s profit/(loss) for the period.

Had the aforementioned acquisition already taken place on 1 January 2020, UNIQA would have reported premiums written in the amount of €6,170,312 thousand. The profit/(loss) for the period would have amounted to €81,040 thousand and earnings per share €0.21.

Investments

2. Investment property

Land and buildings, including buildings on third-party land, held as long-term investments to generate rent revenue and/or for the purpose of capital appreciation are measured in accordance with the cost model. The investment property is subject to straight line depreciation over the useful life of 5 to 80 years and is recognised under the item “Net investment income”.

The fair value is determined using reports prepared by independent experts. These expert reports are prepared based on the income approach. It requires making assumptions about the future, principally concerning the discount rate, the exit yield, the expected utilisation (vacancy rate), the development of future rental charges, and the condition of the land and buildings. Property value, location, usable area and usage category for the property are also taken into account.

For this reason, all measurements of the fair value for the land and buildings come under Level 3 of the hierarchy in accordance with IFRS 13. The measurement techniques respond to the underlying assumptions and parameters.

For instance, any reduction in the discount rate applied would result in an increase in the values ascertained for the land and buildings if the other assumptions and parameters remained unchanged.

Conversely, any reduction in the expected utilisation or the expected rental charges would, for instance, result in a decrease in the values ascertained for the land and buildings if the other assumptions and parameters remained unchanged. The measurement-related assumptions and parameters are ascertained at each key date based on the best estimate by management with due respect to the current prevailing market conditions.

The effects of Covid-19

UNIQA’s real estate portfolio is oriented mainly towards office space. In addition, UNIQA holds properties in retail, residential and hotel sectors. An analysis performed showed no material impact related to Covid-19 on carrying amounts and current income and expenses.

Impairment tests led to minor impairments in the hotel sector. Current income was affected by minor rent reductions, which were offset by lower maintenance expenses.

3. Financial assets accounted for using the equity method

Investments in associates are accounted for using the equity method. They are initially recognised at acquisition cost, which also includes transaction costs. After initial recognition, the consolidated financial statements include the Group's share in profit/(loss) for the period and in changes in other comprehensive income until the date the applicable influence ends.

At each reporting date, UNIQA reviews whether there are any indications that the investments in associates are impaired. If this is the case, then the impairment loss is recorded as the difference between the participation carrying amount of the associate and the corresponding recoverable amount and recognised separately in profit/(loss) for the period. An impairment loss is reversed in the event of an advantageous change in the estimates used to determine the recoverable amount.

Reconciliation of summarised financial information

²⁾ The carrying amounts are calculated based on the shares in circulation. 2020: 15.29%, 2019: 15.29%

As at 31 December 2020, UNIQA held a 14.3 per cent stake in STRABAG SE (31 December 2019: 14.3 per cent).

UNIQA treats STRABAG SE as an associate due to contractual arrangements. As part of the accounting using the equity method, an assessment of the share in STRABAG SE was made, based on the financial information published at 30 June 2020, for the period up until 31 December 2020.

The fair value of the shares is based on the stock market price at 31 December 2020 and amounts to €446,950 thousand (2019: €486,156 thousand). Although the external impairment indicator was available, no impairment was required.

4. Other investments and unit-linked and index-linked life insurance investments

UNIQA has applied the deferral approach for IFRS 9 since 1 January 2018. This enables UNIQA to postpone the date of first-time application of IFRS 9 until IFRS 17 comes into force.

Financial assets are recognised for the first time on the settlement date. They are derecognised when the contractual rights to cash flows from an asset expire or the rights to receive the cash flows in a transaction in which all major risks and opportunities connected with the ownership of the financial asset are transferred.

Financial assets at fair value through profit or loss

Financial assets are recognised at fair value through profit or loss if the asset is either held for trading or is designated at fair value and recognised in profit and loss (fair value option). These include structured bonds, hedge funds and investment certificates whose original classification fell within this category.

The fair value option is applied to structured products that are not split between the underlying transaction and the derivative but are instead accounted for as a unit. Unrealised gains and losses are recognised in profit/(loss) for the period.

Derivatives are used within the limits permitted under the Austrian Insurance Supervisory Act for hedging investments and for increasing earnings. All fluctuations in value are recognised in profit/(loss) for the period. Financial assets from derivative financial instruments are recognised under other investments. Financial liabilities from derivative financial instruments are recognised under financial liabilities.

Available-for-sale financial assets

Available-for-sale financial assets are initially measured at fair value plus directly attributable transaction costs. Subsequently, available-for-sale financial assets are measured at fair value. Corresponding value changes are, with the exception of impairment and foreign exchange differences in the case of available-for-sale debt securities, recognised in the accumulated profits in equity. When an asset is derecognised, the accumulated other comprehensive income is reclassified to profit/(loss) for the period.

Impairment of available-for-sale financial assets is recognised in profit/(loss) for the period by reclassifying the losses accumulated in equity. The accumulated loss that is reclassified from equity to profit/(loss) for the period is the difference between the acquisition cost, net of any redemptions, amortisations and less any impairment loss previously recognised in profit or loss – and current fair value. If the fair value of an impaired, available-for-sale debt instrument increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment was recognised, the impairment is reversed, with the amount of the reversal recognised in profit/(loss) for the period. Reversals of impairment losses of equity instruments held at fair value cannot be recognised in profit/(loss) for the period.

Loans and receivables

When first recognised, loans and receivables are measured at their fair value plus directly attributable transaction costs. Subsequently, they are measured at amortised cost using the effective interest method.

For debt instruments and assets in the category “Loans and receivables”, this test is executed within the framework of an internal impairment process. If there are objective indications that the value currently attributed is not tenable, an impairment is recognised.

Objective indications that financial assets are impaired are:

- the default or delay of a debtor,
- the opening of bankruptcy proceedings for a debtor, or signs indicating that such proceedings are imminent,
- adverse changes in the rating of borrowers or issuers,
- changes in the market activity of a security, or
- other observable data that indicate a significant decrease in the expected payments from a group of financial assets.

In the case of an investment in an equity instrument, a significant or prolonged decline in the fair value below its cost is also objective evidence of impairment. A significant decrease is a decrease of 20 per cent, and a prolonged decline is one that lasts for at least nine months.

Impairment is calculated as the difference between the carrying amount and the present value of the estimated future cash flows, discounted at the original effective interest rate of the asset. Losses are recognised in profit/(loss) for the period. If there are no realistic chances of recovering the asset, an impairment has to be recognised. In case of an event that causes a reversal of impairment losses, this is recognised in profit/(loss) for the period. In the event of a definitive non-performance, the asset is derecognised.

Other investments are broken down into the following classes and categories of financial instruments:

Determination of fair value

A range of accounting policies and disclosures requires the determination of the fair value of financial and non-financial assets and liabilities. UNIQA has defined a control framework with regard to the determination of fair value. This includes a measurement team, which bears general responsibility for monitoring all major measurements of fair value, including Level 3 fair values, and reports directly to the respective Member of the Management Board.

A review of the major unobservable inputs and the measurement adjustments is carried out regularly. If information from third parties (e.g. price quotations from brokers or price information services) is used to determine fair values, the evidence obtained from third parties is examined in order to see whether such measurements meet the requirements of IFRSs. The level in the fair value hierarchy to which these measurements are attributable is also tested. Major items in the measurement are reported to the Audit Committee.

As far as possible, UNIQA uses data that are observable on the market when determining the fair value of an asset or a liability. Based on the inputs used in the measurement techniques, the fair values are assigned to different levels in the fair value hierarchy.

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities. At UNIQA, these primarily involve quoted shares, quoted bonds and quoted investment funds.

- Level 2: Measurement parameters that are not quoted prices included in Level 1 but which can be observed for the asset or liability either directly (i.e. as a price) or indirectly (i.e. derived from prices), or are based on prices from markets that have been classified as inactive. The parameters that can be observed here include, for example, exchange rates, yield curves and volatilities. At UNIQA, these include in particular quoted bonds that do not fulfil the conditions under Level 1, along with structured products.
- Level 3: measurement parameters for assets or liabilities that are not based or are only partly based on observable market data. The measurement here primarily involves application of the discounted cash flow method, comparative procedures with instruments for which there are observable prices and other procedures. As there are no observable parameters here in many cases, the estimates used can have a significant impact on the result of the measurement. At UNIQA, it is primarily other equity investments, private equity and hedge funds as well as structured products that do not fulfil the conditions under Level 2 that are assigned to Level 3.

If the inputs used to determine the fair value of an asset or a liability can be assigned to different levels of the fair value hierarchy, the entire fair value measurement is assigned to the respective level of the fair value hierarchy that corresponds to the lowest input significant for the measurement overall.

UNIQA recognises reclassifications between different levels of the fair value hierarchy at the end of the reporting period in which the change occurred.

The measurement processes and methods are as follows:

Financial instruments measured at fair value

For the measurement of capital investments, techniques best suited for the establishment of corresponding value are applied. The following standard measurement techniques are applied for financial instruments which come under Levels 2 and 3:

- **Market approach**
The measurement method in the market approach is based on prices or other applicable information from market transactions which involve identical or comparable assets and liabilities.
- **Income approach**
The income approach corresponds to the method whereby the future (expected) payment flows or earnings are inferred on a current amount.
- **Cost approach**
The cost approach generally corresponds to the value which would have to be applied in order to procure the asset once again.

Transfers between levels 1 and 2

In the reporting period transfers from Level 1 to Level 2 were made in the amount of €255,520 thousand (2019: €492,529 thousand) and from Level 2 to Level 1 in the amount of €493,055 thousand (2019: €144,533 thousand).

These are attributable primarily to changes in trading frequency and trading activity.

Sensitivities

Fixed-income securities

The main unobservable input in the measurement of fixed-income securities is the specific credit spread. In order to be able to measure these securities in a discounted cash flow model, the spreads are derived from a selection of reference securities with comparable characteristics. For the fixed-income securities in Level 3, an increase in the discount rate by 100 basis points results in a 7.0 per cent reduction in value (2019: 6.2 per cent). A reduction in the discount rate by 100 basis points results in an 8.3 per cent increase in value (2019: 7.5 per cent).

Other

Other securities under Level 3 mainly comprise private equity funds and other participations. Private equity funds are measured based on the net asset values which are determined by the fund manager using specific unobservable inputs for all underlying portfolio positions. This is done in accordance with the International Private Equity and Venture Capital Valuation (IPEV) Guideline. For other equity investments under Level 3, invested capital is considered to be an appropriate measure of fair value. In these cases, a sensitivity analysis is not applicable.

Carrying amounts for loans and other investments

In € thousand

	31/12/2020	31/12/2019
Loans		
Loans to affiliated unconsolidated companies	0	4,400
Mortgage loans	7,925	9,931
Loans and advance payments on policies	12,343	12,827
Other loans	110,000	103,094
Total	130,269	130,251
Other investments

Negative currency effects from investments amounting to €8,547 thousand (2019: positive currency effects amounting to €1,304 thousand) were recognised directly in equity.

The effects of Covid-19

Net investment income fell overall compared with the previous year due to negative capital market developments caused by Covid-19 in the 2020 financial year. However, an upward trend was recorded in developments on the capital markets from the second quarter of 2020 onwards.

Expenses from investments increased on the previous year primarily as a result of impairments. Any reversals of impairment losses were recognised in other comprehensive income under the item “Profits recognised in equity from the measurement of financial instruments available for sale”.

Technical items

Insurance and reinsurance contracts along with investment contracts with a discretionary participation feature fall within the scope of IFRS 4 (Insurance Contracts). In accordance with IAS 8, the provisions of US Generally Accepted Accounting Principles (US GAAP) in the version applicable on 1 January 2005 were applied to all cases for which IFRS 4 contains no specific regulations on recognition and measurement. For accounting and measurement of the insurance-specific items of life insurance with profit participation, FAS 120 was observed; FAS 60 was applied for specific items in health, property and casualty insurance and FAS 113 for reinsurance. Unit-linked life insurance, where the policyholder bears the entire investment risk, was accounted for in accordance with FAS 97.

Based on the regulations, technical items must be covered by suitable assets (cover funds). As is standard in the insurance industry, amounts dedicated to the cover funds are subject to a limitation as regards availability in the Group.

Insurance and investment contracts

Insurance contracts are contracts through which a significant insurance risk is assumed. Investment contracts, i.e. contracts that do not transfer a significant insurance risk and that do not include a discretionary profit participation feature. They fall under the scope of IAS 39 (Financial Instruments).

Reinsurance contracts

Ceded reinsurance is stated in a separate item under assets. The profit and loss items (premiums and payments) are deducted openly from the corresponding items in the gross account, while commission income is reported separately as its own item. Reinsurance acquired (indirect business) is recognised as an insurance contract.

6. Technical provisions

Unearned premiums

For short-term insurance contracts, such as most property and casualty insurance policies, premiums relating to future years are reported as unearned premiums in line with the applicable regulations of US GAAP. The amount of these unearned premiums corresponds to the insurance cover granted proportionally in future periods. Premiums levied upon entering into certain long-term contracts (e.g. upfront fees) are recognised as unearned premiums. In line with the applicable regulations of US GAAP, these fees

are recorded in the same manner as the redemption of deferred acquisition costs. These unearned premiums are in principle calculated for each individual policy and exactly to the day. If they are attributable to life insurance, they are included in insurance provision.

Insurance provision

Insurance provisions are essentially established in the life and health insurance lines. Their carrying amount is determined based on actuarial principles on the basis of the present value determined prospectively of future benefits to be paid by the insurer less the present value of future net premiums the insurer expects to receive on an individual contract basis. Insurance provisions are also established in the property and casualty lines that cover life-long obligations (accident pensions as well as pensions in motor vehicle liability insurance). The insurance provision of the life insurer is calculated by taking into account contractually agreed calculation principles, which are explained in more detail under the actuarial risks in Chapter 44, "Risk profile". These calculation principles take into account assumptions related to costs, mortality, invalidity and interest rate changes. Reasonable safety margins are included here in order to account for the risk of adjustments, errors and contingencies over the term of the contract.

For policies that are mainly of investment character (e.g. unit-linked life insurance), the provisions of FAS 97 are used to measure insurance provision. Insurance provision is arrived at by combining the invested amounts, the change in value of the underlying investments and the withdrawals under the policy.

Insurance provisions for health insurance are determined based on calculation principles that correspond to the "best estimate", taking into account safety margins. Once calculation principles have been determined, they have to be applied to the corresponding partial portfolio for the whole duration (locked-in principle).

Provision for unsettled claims

The provision for unsettled claims includes both the provision for claims already reported by the reporting date as well as the provision for damage that has not yet been reported but which has already occurred.

The provision in property and casualty insurance is determined based on a best estimate. Standard actuarial models are used to calculate the claim reserves with the parameters for these based on historical data. The assumptions made are reviewed continuously and adjusted if necessary. Examples of material assumptions include growth in claims frequency and in average claims expenses. Another material assumption is the settlement patterns for the individual lines of business which can be impacted by various factors. Assumptions regarding the future progress of claims inflation are only made to the extent that the future development is extrapolated based on historical observations. In insurance lines in which past experience does not allow the application of statistical methods, calculations are made on the basis of market data or expert assessments.

Discounting of claims reserves only takes place with respect to a small section of the annuity reserves for which an insurance provision is also formed. Recourse payments expected in future are deducted from the provision for unsettled claims. Costs of settling the claim that are directly attributable to the claim event such as costs of an expert report are already included in the calculation for the provision. Provisions for internal settlement expense are determined in a separate calculation procedure. The calculation of the provision for unsettled claims involves uncertainty on account of the contingency risk in the underlying assumptions. Further information on this can be found in Chapter 44, "Risk profile".

For health insurance, provisions for unsettled claims are estimated on the basis of past experience, taking into consideration the known arrears in claim payments.

Life insurance is calculated on an individual loss basis with the exception of the provision for unreported claims.

Provision for the assumed reinsurance business generally complies with the figures of the cedents.

Provisions for premium refunds and profit participation

The provision for premium refunds includes the amounts for profit-related and non-profit related profit participation to which the policyholders are entitled on the basis of statutory or contractual provisions.

In life insurance, policies with a discretionary participation feature, differences between local measurement and measurement in accordance with IFRSs are presented with deferred profit participation taken into account, whereby this is also reported in profit/(loss) for the period or in other comprehensive income depending on the recognition of the change in the underlying measurement differences. The amount of the provision for deferred profit participation generally comes to 85 per cent of the measurement differentials after tax.

Other technical provisions

This item contains provisions for contingent losses for acquired reinsurance portfolios as well as provisions for expected cancellations and premium defaults.

Liability Adequacy Test

The Liability Adequacy Test evaluates whether the established IFRS reserves are sufficient. For life insurance portfolios, a best estimate reserve is compared with the IFRS reserve less deferred acquisition costs plus unearned revenue liability (URL). This calculation is done separately each quarter for mixed insurance policies, pension policies, risk insurance policies, and unit-linked and index-linked policies.

Because UNIQA already uses the best estimate approach for calculating loss reserves in non-life insurance, only the premiums to be expected in the future will be tested. Business lines that feature a surplus in the annual calculation of less than 5 per cent from future premiums less claims and costs expected in future are reviewed each quarter. In non-life insurance, the business lines tested are motor vehicle liability insurance, general liability insurance and other.

7. Technical provisions for unit-linked and index-linked life insurance

This item relates to insurance provisions and remaining technical provisions for obligations from life insurance policies where the value or income is determined by investments for which the policyholder bears the risk or for which the benefit is index-linked. The investments in question are collected in asset pools, recognised at their fair value and kept separately from the other investments. As a general rule, the measurement of the provisions corresponds with the item “Unit-linked and index-linked life insurance investments”. The policyholders are entitled to all income from these investments. The unrealised gains and losses from fluctuations in the fair values of the investment pools are thus offset by the appropriate changes in these provisions. The reinsurers’ share corresponds to a liability for deposits in the same amount.

An unearned revenue liability allocated to future year premium shares (such as preliminary fees) is calculated for unit-linked and index-linked life insurance contracts in accordance with FAS 97 and amortised correspondingly to deferred acquisition costs over the contract period.

Technical provisions for unit-linked and index-linked life insurance

	31/12/2020	31/12/2019
Gross	5,115,506	4,646,152
Reinsurers’ share	-131	-113
Total	5,115,375	4,646,039

8. Premiums

The item “Premiums written – gross” includes those amounts that have been called due either once or on an ongoing basis in the financial year for the purposes of providing the insurance coverage. In the event of payment in instalments, premiums written are increased by the charges added during the year and the ancillary charges in line with the tariffs. In the case of unit-linked and index-linked life insurance, only the premiums decreased by the savings portion are stated in the item “Premiums written”.

The effects of Covid-19

After adjustment for the premiums of the acquired AXA companies, premium volumes fell slightly overall compared with the previous year due to Covid-19. While premium volumes decreased slightly in the UNIQA International segment, a slight increase was recorded in the UNIQA Austria segment despite Covid-19.

In property and casualty insurance, the marine, aviation and transport insurance business lines as well as other insurance lines recorded a slight decline in premiums as a result of Covid-19.

No impact was observed in the health and life insurance business lines that could be clearly attributed to Covid-19.

The effects of Covid-19

Covid-19 had differing effects on insurance benefits – after adjustment of the insurance benefits of the acquired AXA companies.

In property and casualty insurance, due to limited mobility, there was a significant decline in payments for insurance claims in motor vehicle liability insurance, other motor vehicle insurance and private casualty insurance.

Conversely, there was a slight increase in insurance benefits due to business interruptions and event cancellations. Overall, insurance benefits in property and casualty insurance declined.

In absolute terms, there was an increase in benefits in health insurance, although it was small in relation to the rise in premiums. This is primarily due to the lower utilisation of medical services.

No significant impact was identified on insurance benefits in life insurance as a result of Covid-19.

Other non-current assets

11. Property, plant and equipment

Property, plant and equipment are accounted for using the cost model.

Gains on the disposal of property, plant and equipment are recorded under the item “Other insurance income”, while losses are recorded under “Other technical expenses”.

If the use of a property changes and an owner-occupied property becomes an investment property, the property is reclassified as investment land and buildings with the carrying amount at the date of the change.

Property, plant and equipment are depreciated on a straight line basis over a useful life for buildings of 5 to 80 years and for technical systems and operating and office equipment of 2 to 20 years. Depreciation methods, useful lives and residual values are reviewed on every reporting date and adjusted if necessary. The depreciation charges for property, plant and equipment are recognised in profit/(loss) for the period on the basis of allocated oper-

ating expenses under the items “Insurance benefits”, “Operating expenses” and “Net investment income” so that the expenses and earnings are distributed on the basis of their causation.

Leases

There are around 1,500 contracts throughout the entire Group which fall within the scope of the standard and for which UNIQA is lessee. Nearly all contracts are simple standard contracts. They mainly relate to real estate and in part to operating and office equipment. A significant portion of the capitalised rights of use consists of a small number of contracts concluded for an indefinite period, for which estimates had to be made regarding their duration and the exercise of termination options. The terms used to calculate these contracts are up to 40 years. The average contract term of the remaining contracts is between three and five years.

The discount rate used to determine the liability consists of the risk-free interest rate adjusted for country risk, creditworthiness, the quality of collateral and a repayment factor.

Non-lease components included in the leases will not be allocated. Leases with a contractual term of less than twelve months and low value assets were not recognised.

major accounting policies as well as new and amended standards”).

UNIQA has not made use of the relief option for Covid-19-related payment benefits (see also Chapter “Changes in

12. Intangible assets

Deferred acquisition costs

Based on US GAAP, deferred acquisition costs are accounted for in accordance with IFRS 4. In the case of property and casualty insurance contracts, costs directly attributable to the acquisition are deferred and distributed over the expected contract term or according to the unearned premiums. In life insurance, the deferred acquisition costs are amortised in line with the pattern of expected gross profits or margins. Deferred acquisition costs for insurance activities that are directly related to new business and/or to extensions of existing policies and that vary in line with that business are capitalised. They are amortised over the term of the respective insurance contract. If they are attributable to property and casualty insurance, they are amortised over the probable contractual

term. For long-term health insurance contracts, the amortisation of acquisition costs is measured in line with the proportionate share of earned premiums in the present value of expected future premium income. In life insurance, the acquisition costs are amortised over the duration of the contract in the same proportion as the actuarial profit margin of each individual year is realised in comparison to the total margin to be expected from the contracts. The changes in deferred acquisition costs are recognised as part of profit/(loss) for the period under the item "Operating expenses".

Value of business in force (VBI)

Values of life, property and casualty insurance policies as well as pension fund contracts relate to expected future margins from purchased operations. They are recognised at the fair value at the acquisition date.

The amortisation of the current value of business in force follows the progression of the estimated gross margins. The amortisation of the value of business in force is recognised in the profit/(loss) for the period under "Amortisation of VBI and impairment of goodwill".

Goodwill

Ascertainment and allocation of goodwill

For the purpose of the impairment test, UNIQA has allocated the goodwill to cash-generating units (CGUs) below, which coincide with the countries in which UNIQA operates. An exception to this was the SIGAL Group, in which the three countries of Albania, Kosovo and North Macedonia were combined as one CGU due to their similar development and organisational connection:

- UNIQA Austria
- Albania/Kosovo/North Macedonia as subgroup of the SIGAL Group (SEE)
- Bulgaria (SEE)
- Poland (CE)
- Romania (EE)
- Russia (RU)
- Serbia (SEE)
- Czech Republic (CE)
- Hungary (CE)

Goodwill by CGU

Other	3,544	3,567
Total	352,922	236,727

Impairment test for goodwill

The impairment test was performed during the preparation of the financial statements. In order to test the impairment for goodwill, the recoverable amount of the CGUs is determined. Impairment is recognised when the recoverable amount of a CGU is less than its value to be covered, consisting of goodwill, the proportional net assets and any capital increases. The impairment of goodwill is recognised in profit/(loss) for the period under the item “Amortisation of VBI and impairment of goodwill”.

Determination of the recoverable amount

The recoverable amount of the CGUs with goodwill allocated is calculated on the basis of value in use by applying generally accepted measurement principles by means of the discounted dividend method (DDM). The budget projections (detailed planning phase) of the CGUs, the estimate of the long-term net profits achievable by the CGUs and long-term growth rates (perpetuity) are used as the starting point for determination of the capitalised value.

The capitalised value is determined by discounting the future profits with a suitable capitalisation rate after assumed retention to strengthen the capital base. In the process, the capitalised values are separated by the three business lines, which are then totalled to yield the value for the entire company.

Cash flow forecast (multi-phase model)

Phase 1: five-year company planning

The detailed company planning generally encompasses a period of five years. The company plans used for the calculation are the result of a structured and standardised management dialogue. This includes an integrated reporting and documentation process integrated into this dialogue and takes into account empirical values from previous planning periods. The plans are formally approved by the Group Management Board and also include material assumptions regarding the combined ratio, capital earnings, market shares and the like.

Phase 2: perpetuity growth rate

The last year of the detailed planning phase is used as the basis for determining cash flows in phase 2. From the 2020 financial year, the perpetuity growth rate is based on medium-term growth forecasts of the respective national economy and is not derived based on the insurance density as before. The underlying growth assumptions depend on the geographical location and range from 1 to 4 per cent. Various studies and statistical analyses were used as sources to provide a basis for determining the growth rates in order to consistently and realistically reflect the market situation and macroeconomic development. The reference sources include our own research, as well as country risks, growth rate estimations and multiples published by Damodaran (NYU Stern).

Determining the capitalisation rate

The assumptions with regard to risk-free interest rate, market risk premium and business line betas made for determining the capitalisation rate are consistent with the parameters used in the UNIQA planning and controlling process. They are based on the capital asset pricing model.

In order to depict the economic situation of income values as accurately as possible, considering the volatility on the markets, the capitalisation rate was calculated as follows: a uniform, risk-free interest rate according to the Svensson method (a 30-year spot rate for German federal bonds) was used as a base interest rate.

The beta factor was determined on the basis of the monthly betas over the last ten years for a defined peer group. The betas for the non-life, life and health insurance business lines were determined using the revenues in the relevant business lines of the individual peer group companies. The health insurance business line, which is strongly focused on the Austrian market, is operated in a manner similar to life insurance. A uniform beta factor for personal insurance is therefore used in relation to the health and life insurance lines.

In Austrian measurement practice, the market risk premium is derived at the reporting date from the implied

market return based on capital market data. The growth factor is derived in the same manner as the growth in the profit from ordinary activities in the impairment test.

An additional country risk premium was defined in accordance with Professor Damodaran's models. The basic principles for calculation of the country risk premium in accordance with the Damodaran method are as follows: the spread of credit default swap spreads in a rating class of "risk-free" US government bonds is determined starting from the rating of the country concerned (Moody's). Then the spread is adjusted by the amount of the volatility difference between equity and bond markets.

The calculation also factored in the inflation differential for countries outside the eurozone. In general, the inflation differential represents inflation trends in different countries and is used as a key indicator in assessing competitiveness. In order to calculate the inflation differential, the deviation of the inflation forecast for the country of the CGU in question in relation to the inflation forecast for a risk-free environment (Germany, in this case) was used. This is adjusted annually in the detailed planning by the expected inflation, and is subsequently applied for perpetuity with the value of the last year of the detailed planning phase.

Capitalisation rate 2020

Impairments for the financial year

The UNIQA 3.0 strategic programme also requires a review of medium-term planning. The changes to the planning assumptions result in impairment losses on goodwill for the CGU Bulgaria in the amount of €19.1 million, the CGU Romania in the amount of €61.3 million, the CGU Serbia in the amount of €20.0 million and the CGU SIGAL Group in the amount of €5.3 million.

Sensitivity analyses

In order to substantiate the results of the calculation and estimation of the value in use, sensitivity analyses with regard to the capitalisation rate and the main value drivers are performed.

These analyses show that sustained surpluses on the part of the individual CGUs are highly dependent on the actual development of these assumptions within the individual national or regional economies (GDP, insurance density, purchasing power parities particularly in the CEE markets) as well as the associated implementation of the individual profit goals. These forecasts and the related assessment of how the situation in the markets will develop in the future, under the influence of the continuing financial crisis in individual markets, are the largest uncertainties in connection with measurement results.

In the event that the insurance markets develop entirely differently from the assumptions made in those business plans and forecasts, the individual goodwill amounts may incur impairment losses.

A sensitivity analysis shows that if there was a rise in interest rates of 50 basis points or a change in the underlying

cash flow by –5 per cent for CGU Bulgaria and SIGAL, the value in use could fall below the carrying amount.

Other intangible assets

Other intangible assets include both purchased and internally developed software, which is depreciated on a straight-line basis over its useful economic life of 2 to 20 years.

Costs that are incurred at the research stage for internally generated software are recognised through profit or loss for the period in which they were incurred. Costs that are incurred in the development phase are deferred provided that it is foreseeable that the software will be completed, there is the intention and ability for future internal use, and this will result in a future economic benefit.

Rights of use for leased intangible assets are not recognised.

The amortisation of the other intangible assets is recognised in profit/(loss) for the period on the basis of allocated operating expenses under the items “Insurance benefits”, “Operating expenses” and “Net investment income”.

Measurement of non-financial assets

The carrying amounts of UNIQA’s non-financial assets – excluding deferred tax assets – are reviewed at every reporting date to determine whether there is an indication of impairment. If this is the case, the recoverable amount of the asset is estimated. The goodwill and intangible assets under construction are tested for impairment annually, unless a triggering event occurs.

An impairment loss on goodwill is not reversed. In the case of other assets, an impairment loss is reversed only to the extent that it does not increase the carrying amount of the asset above the carrying amount that would have been

determined net of depreciation or amortisation had no impairment loss been recognised.

Income tax expenses	32,775	56,953
Average effective tax burden (in per cent)	57.4	19.3

¹⁾ Earnings before taxes multiplied by the corporate income tax rate

Excluding impairments of goodwill in the amount of €105,752 thousand, the average effective tax burden would come to 20.1 per cent.

Group taxation

In Austria, UNIQA exercises the option of forming a group of companies for tax purposes. There are three taxable groups of companies with the parent groups UNIQA Insurance Group AG, PremiQaMed Holding GmbH and R-FMZ Immobilienholding GmbH.

The group members are generally charged, or relieved by, the corporation tax amounts attributable to them by the parent group through the distribution of their tax burden in the tax group. Losses from foreign group members are also included within the scope of taxable profits. The tax realisation for these losses is accompanied by a future tax obligation to pay income taxes at an unspecified point in time. A corresponding provision is therefore formed for future subsequent taxation of foreign losses.

16. Deferred taxes

The calculation of deferred taxes is based on the specific tax rates of each country, which were between 9 and 25 per cent in the financial year (2019: between 9 and 25 per cent). Changes in tax rates in effect at 31 December 2020 are taken into account.

The deferred tax assets and deferred tax liabilities stated in the consolidated statement of financial position performed as follows:

Net deferred tax

In € thousand

At 1 January 2019 adjusted	-236,488
Changes recognised in profit/(loss)	-11,961
Changes recognised in other comprehensive income	-102,951
Reclassifications held for sale	-1,088
Foreign exchange differences	186
At 31 December 2019 adjusted	-352,302
At 1 January 2020	-352,302
Changes recognised in profit/(loss)	4,867
Changes recognised in other comprehensive income	-50,057
Changes due to changes in basis of consolidation	-18,964
Foreign exchange differences	1,166
At 31 December 2020	-415,291

Changes recorded in other comprehensive income essentially relate to measurements of financial instruments available for sale and remeasurements of defined benefit obligations.

The differences between the tax carrying amounts and the carrying amounts in the IFRS consolidated statement of financial position have the following effect:

In € thousand

31/12/2020 31/12/2019
adjusted

Deferred tax assets		
Technical items	54,528	57,568

Actuarial gains and losses on defined benefit obligations	1	1
Other items	28,994	23,600
Total	704,331	528,792
Netting effect	-280,447	-171,253
Total after netting	423,884	357,539
Net deferred tax	-415,291	-352,302

The temporary differences in connection with shares in subsidiaries and associates for which no deferred tax liabilities were recognised amounted to €1,778,691 thousand (2019: €1,657,532 thousand).

An assessment of the ability to realise deferred tax assets for tax losses not yet used, tax credits not yet used and deductible temporary differences requires an estimate of the amount of future taxable profits. The resulting forecasts are based on business plans that are prepared, reviewed and approved using a uniform procedure throughout the company. Especially convincing evidence regarding the value and future chance of realisation of deferred tax assets is required under internal Group policies if the relevant Group company has suffered a loss in the current or a prior period.

The deferred tax assets stated include €17,046 thousand (2019: €12,471 thousand) attributable to tax loss carryforwards. Deferred tax assets from loss carryforwards in the amount of €11,023 thousand (2019: €10,577 thousand) were not recognised, as a realisation of these in the near future cannot be assumed, taking maturities into account.

The tax loss carryforwards of €139,365 thousand (2019: €132,128 thousand) are forfeited as follows, with “more than 5 years” also including tax loss carryforwards with no forfeit date of €112,986 thousand (2019: €87,247 thousand).

In € thousand	31/12/2020	31/12/2019
Up to 1 year ¹⁾	8,358	11,187
2 to 5 years ²⁾	12,336	19,604
More than 5 years ³⁾	118,671	101,338
Total	139,365	132,128

¹⁾ Loss carryforwards for which no deferred tax assets have been recognised amount to €1,081 thousand at 31 December 2020 (31 December 2019: €4,560 thousand)

²⁾ Loss carryforwards for which no deferred tax assets have been recognised amount to €5,455 thousand at 31 December 2020 (31 December 2019: €3,664 thousand)

³⁾ Loss carryforwards for which no deferred tax assets have been recognised amount to €53,409 thousand at 31 December 2020 (31 December 2019: €54,048 thousand)

The tax loss carryforwards include both loss carryforwards on which deferred tax assets have been recognised and loss carryforwards on which no deferred tax assets have been recognised.

Social capital

17. Defined benefit plans

There are individual contractual pension obligations, individual contractual bridge payments, and pension allowances in accordance with association recommendations.

The calculation of defined benefit obligations is carried out annually using the projected unit credit (PUC) method. If the calculation results in a potential asset, the asset recognised is limited to the present value of any economic benefit available in the form of future refunds from the plan or reductions in future contributions to the plan. Any valid minimum funding requirements are included in the calculation of the present value of the economic benefit.

Remeasurement of net liabilities from defined benefit plans are recognised directly in other comprehensive income. The remeasurement includes the actuarial gains and losses, the income from plan assets (not including projected interest income) and the effect of any asset ceiling. Net interest expenses (income) on net liabilities (assets) from defined benefit plans are calculated for the reporting period by applying the discount rate. The discount rate was used to measure the defined benefit obligation at the

start of the annual reporting period. This discount rate is applied to net liabilities (assets) from defined benefit plans on this date. Any changes in net liabilities (assets) from defined benefit plans resulting from contribution and benefit payments over the course of the reporting period are taken into account. Net interest expenses and other expenses for defined benefit plans are recognised through profit or loss in profit/(loss) for the period.

If a plan's defined benefits are changed or a plan is curtailed, the resulting change in the benefit relating to past service costs or the gain or loss on the curtailment is recognised directly in profit/(loss) for the period. Gains and losses from the settlement of a defined benefit plan are recognised at the date of the settlement. The defined benefit obligations are stated under the balance sheet item “Other provisions”.

Pension entitlements

Individuals who hold an individual contractual agreement can generally claim a pension when they reach the age of 60 or 65, subject to certain conditions. The amount of the pension generally depends on the number of their years of service and their last salary before leaving their active employment. In the event of death, the spouse of the individual entitled to the claim receives a pension at 60, 50 or 40 per cent depending on the policy. The pensions are suspended for any period in which a termination benefit is paid, and their value is generally guaranteed. The pensions that are based on individual policies or on association recommendations are financed through provisions. The final pension contribution which guarantees a fixed cash value for when the beneficiary begins their retirement is set aside during the contribution phase and transferred to the pension fund at the time of retirement. The financing is specified in the pension fund's business plan, in the works council agreement and in the pension fund contract.

Termination benefit entitlements

In the case of employees of Austrian companies whose employment began prior to 31 December 2002 and lasted three years without interruption, the employee is entitled to termination benefits when the employment is terminated, unless the employee resigns, leaves without an important reason or is dismissed.

The measurement of the defined benefit obligations is based on the following actuarial calculation parameters:

Calculation factors applied	2020	2019
Discount rate in termination benefits	–0.1	0.3
Discount rate in pensions	0.4	0.8
Valorisation of remuneration	3.0	3.0
Valorisation of pensions	2.0	2.0
Employee turnover rate	dependent on years of service	dependent on years of service
Calculation principles	AVÖ 2018 P – salaried employees	AVÖ 2018 P – salaried employees

Weighted average duration in years	Pensions	Termination benefits
31 December 2020	13.4	7.1
31 December 2019	14.6	7.7

The sensitivity of the defined benefit obligations on changes in the weighted actuarial calculation parameters is:

18. Defined contribution plans

Obligations for contributions to defined contribution plans are recognised as expenses through profit or loss as soon as the associated work is performed. Prepaid contributions are recognised as assets if an entitlement to re-fund or reduction of future payments arises. The defined contribution plan is financed largely by UNIQA.

Pension entitlements

Board members, special policyholders and active employees in Austria are subject to a basic defined contribution pension fund scheme. The beneficiaries are also entitled to a final pension fund contribution which guarantees them a fixed cash value when they begin their retirement. Since the first pension to be paid out to the beneficiaries has a fixed benefit amount, this commitment is to be classified as a defined benefit in the contribution phase. The works council agreement states the extent to which a final pension fund contribution is provided to the beneficiary's individual assurance cover account in the event of a transfer to the old-age pension or of an incapacity to work or the death of a participant. UNIQA has no obligations during the benefit phase.

Contributions to company pension funds

Under the defined contribution company pension scheme, the employer pays the fixed amounts into company pension funds. The insurance contributions to company pension funds amounted to €4,537 thousand (2019: €4,231 thousand). The employer has satisfied their obligation by making these contributions.

19. Restructuring measures

The Supervisory Board approved the UNIQA 3.0 strategic programme in November 2020. This programme aims to make UNIQA even more focused on the customer and makes internal processes simpler, more efficient and more cost-effective. This will be accompanied by cutbacks in the UNIQA Group's workforce. Staff reductions will be achieved wherever possible through natural attrition and contract terminations agreed through mutual consent. The severance scheme that has been agreed includes special severance, partial retirement and other compensation models. A provision for restructuring measures was recognised in the amount of €98,587 thousand on account of these measures, which mainly involve a reduction in the number of employees in Austria.

The provision for restructuring measures is stated under the balance sheet item "Other provisions". It is mainly disclosed in the consolidated income statement under the items "Insurance benefits" and "Operating expenses".

At 31 December 2020 the number of employees of the acquired AXA companies is 1,986. These were reported in the average number of salaried employees in relation to the time period from the acquisition date.

Equity

21. Subscribed capital and capital reserves

The share capital is comprised of 309,000,000 no-par-value bearer shares. Capital reserves include unallocated capital reserves, which primarily result from share premiums.

A dividend of €0.18 per share was paid on 8 June 2020. This corresponds with a distribution amounting to €55,254 thousand. Subject to the approval of the Annual General Meeting, a dividend payment in the amount of €0.18 per share is planned for the financial year, which equates to a distribution in the amount of €55,254 thousand.

22. Treasury shares

Authorisations of the Management Board

In accordance with the resolution of the Annual General Meeting dated 20 May 2019, the Management Board is authorised to increase the company's share capital up to and including 30 June 2024 with the approval of the Supervisory Board by a total of up to €80,000,000 by issuing up to 80,000,000 no-par-value bearer or registered shares in exchange for payment in cash or in kind, one time or several times.

In accordance with the resolution of the Annual General Meeting dated 25 May 2020, the Group Management Board was again authorised to acquire, with the approval of the Supervisory Board, treasury shares for a period of 30 months from 30 November 2020 (the authorisation granted in accordance with the resolution of the Annual General Meeting on 28 May 2018 expired at 29 November 2020). The proportion of the share capital represented by newly acquired shares, together with the proportion of other treasury shares that the company has already acquired and still holds, may not exceed 10 per cent of the share capital. The authorisation to acquire treasury shares also includes the acquisition of shares in the company by subsidiaries of the company.

The treasury shares held via UNIQA Österreich Versicherungen AG stem from the merger of BL Syndikat Beteiligungs Gesellschaft m.b.H., the assigning company, with UNIQA Insurance Group AG, the acquiring company. These shares held are not to be counted towards the 10 per cent limit.

23. Capital management

Capital management takes place with due regard to the regulatory and statutory requirements. After Solvency II came into force on 1 January 2016, the definitions and methods used to calculate available own funds, as well as

risk capital requirements and management standards, were replaced by Solvency II standards.

In the context of Group management, the appropriate coverage of the solvency capital requirement in accordance with Solvency II on a consolidated basis is constantly monitored. Active capital management is implemented in order to ensure that the individual Group companies and the Group as a whole have a reasonable capital base at all times. Aside from the five-year planning, another objective of active capital management is also to actively guarantee UNIQA's financial capacity, including under difficult economic conditions, in order to safeguard the continued existence of the insurance business.

In addition to the solvency capital/minimum capital requirements, UNIQA has set itself a target capitalisation for the Group of at least 170 per cent. The solvency ratio is managed using strategic measures which result in a reduction in the capital requirements and/or increase the amount of existing capital.

UNIQA also takes the potential impact on the rating by recognised rating agencies into account in the capital management process. Standard & Poor's (S&P) currently applies a credit rating of "A-" to UNIQA Insurance Group AG. In the S&P capital model UNIQA achieves significant surplus coverage for the current level. UNIQA assumes that it will secure its surplus coverage of the AA level at a minimum in the long term and will also improve the rating in line with the corporate strategy as a result.

UNIQA Österreich Versicherungen AG and UNIQA Re AG each have a rating of "A". The supplementary capital bond issued in 2013 (€350.0 million Tier 2, first call date: 31 July 2023), the subordinated capital bond issued in 2015 (€500.0 million Tier 2, first call date: 27 July 2026) and the subordinated capital bond issued in 2020 (€200.0 million Tier 2, first call date: 9 July 2025) are rated "BBB" by S&P. The agency rates the outlook for all companies as "stable".

Further quantitative and qualitative information related to capital management according to Solvency II is included in the "Solvency and Financial Condition Report" (SFCR).

24. Non-controlling interests

Non-controlling interests are measured at the acquisition date with their proportionate share in the identifiable net assets of the acquired entity.

Changes in the share in a subsidiary that do not result in a loss of control are recognised directly as equity transactions with non-controlling interests.

Non-controlling interests	31/12/2020	31/12/2019
In € thousand		
In measurement of financial instruments available for sale	5,636	4,255

In other equity	7,982	10,221
Total	24,760	19,399

Subordinated liabilities

In July 2013, UNIQA Insurance Group AG successfully placed a supplementary capital bond to the value of €350 million with institutional investors in Europe. The bond has a maturity period of 30 years and cannot be terminated until after 10 years. The coupon equals 6.875 per cent per annum during the first ten years, after which a variable interest rate applies. The supplementary capital bond satisfies the requirements for equity netting as Tier 2 capital under the Solvency II regime. The issue was also aimed at replacing older supplementary capital bonds from Austrian insurance groups and at bolstering UNIQA's capital resources and capital structure in preparation for Solvency II and optimising these over the long term. The supplementary capital bond has been listed on the Luxembourg Stock Exchange since the end of July 2013. The issue price was set at 100 per cent.

In July 2015, UNIQA Insurance Group AG successfully placed a subordinated capital bond (Tier 2) to the value of €500 million with institutional investors in Europe. The bond is eligible for netting as Tier 2 capital under Solvency II. The bond is scheduled for repayment after a period of 31 years and subject to certain conditions, and can only be cancelled by UNIQA after eleven years have elapsed and under certain conditions. The coupon equals 6.00 per cent per annum during the first eleven years, after which a variable interest rate applies. The bond has been listed on the Vienna Stock Exchange since July 2015. The issue price was set at 100 per cent.

In July 2020 a subordinated bond was also issued in the amount of €200 million at an issue price of 99.507 per cent of the nominal amount. With a term of 15.25 years, it may be terminated for the first time after 5.25 years subject to certain conditions. The annual interest rate is fixed at 3.25 per cent for the first 5.25 years, after which a variable

interest rate applies. The bond is eligible for netting as Tier 2 capital under Solvency II. By issuing a green bond, UNIQA has committed to finance or refinance suitable assets in accordance with the Green Bond Framework at the same level as the issue proceeds. The bond issue has been listed on the Vienna Stock Exchange since July 2020.

Other disclosures

29. Group holding company

UNIQA's Group holding company is UNIQA Insurance Group AG. In addition to its duties as Group holding company, this company also performs the duties of a group reinsurer.

30. Remuneration for the Management Board and Supervisory Board

The members of the Management Board of UNIQA Insurance Group AG assume a dual operational role in their function, as they also hold the Management Board function at UNIQA Österreich Versicherungen AG. This identical composition of the Management Board in both companies enables efficient control of the UNIQA Group. From 1 July 2020 all employment contracts of the members of the Management Board will be with UNIQA Insurance Group AG, which will pay out all remuneration from this date. The remuneration components for the first half of the year for those members of the Management Board who will also be members of the Management Board of the company from 1 July 2020 relate to their Management Board functions at UNIQA Österreich Versicherungen AG and the former UNIQA International AG, which has been merged with UNIQA Österreich Versicherungen AG.

Remuneration of the Management Board

In € thousand

1–12/2020 1–12/2019

	1–12/2020	1–12/2019
Fixed remuneration ¹⁾	4,377	1,574
Variable remuneration ²⁾	2,217	1,141
Multi-year share-based remuneration ³⁾	2,137	468
Current remuneration	8,731	3,183

¹⁾ The fixed salary components include remuneration in kind equivalent to €110 thousand (2019: €35 thousand).

²⁾ The Short-Term Incentive (STI) comprises a variable remuneration component which is paid beginning with the 2017 financial year, partly in the following year and partly after three years (the "deferred component").

³⁾ The Long-Term Incentive (LTI) corresponds to a share-based remuneration agreement first introduced in 2013, with the beneficiary entitled to receive a cash settlement following a four-year term.

For the 2017 financial year, expected payments of €806 thousand will be made for variable remuneration (STI) in subsequent years. For the 2018 financial year, payments of €909 thousand are expected to be made in the year 2022. For the 2019 financial year, payments of €795 thousand are expected to be made in the year 2023. For the 2020 financial year, no short-term incentive due to Covid-19 was made.

As part of the multi-year long-term incentive plan (LTI), payments of €2,137 thousand were made to the members of the Management Board of UNIQA Insurance Group AG in 2020. For the subsequent years 2021 to 2024, a payment of €2,894 thousand is expected for the virtual shares allocated up to 31 December 2020.

For pension commitments and reinsurance to cover these commitments for the members of the Management Board €1,024 thousand were paid in the reporting year (2019: €359 thousand). Of the pension reinsurance amounting to €244 thousand, €184 thousand will be paid in 2021. No compensation payments were made in the current financial year. The amount expended on pensions in the reporting year for former members of the Management Board and their survivors was €2,084 thousand (2019: €2,766 thousand).

The remuneration of the members of the Supervisory Board for their work in the 2019 financial year was €745 thousand. Provisions of €790 thousand have been recognised for the remuneration to be paid for work completed in 2020. The amount paid out in attendance fees and cash expenditures in the financial year was €75 thousand (2019: €72 thousand). From 14 April 2020, the members of the Supervisory Board of UNIQA Insurance Group AG who are also members of the Supervisory Board of UNIQA Österreich Versicherungen AG will receive their daily allowances and remuneration exclusively from UNIQA Insurance Group AG despite their dual function. These daily allowances and remunerations therefore also cover the Supervisory Board activities at UNIQA Österreich Versicherungen AG.

31. Share-based payment agreement with cash settlement

A share-based remuneration programme has been in place for the members of the Management Board of UNIQA Insurance Group AG, UNIQA Österreich Versicherungen AG and UNIQA International AG (merged with UNIQA Österreich Versicherungen AG in the 2020 financial year) since the 2013 financial year. Virtual UNIQA shares are granted

conditionally for each financial year as part of this programme. Cash payments subject to agreed limits are provided for at the end of a performance period of four years for the individual annual tranches or depending on certain key performance targets.

The selected key performance targets are aimed at ensuring a relative market-based performance measurement and absolute performance measurement in accordance with the individual corporate objectives of the UNIQA Group. These defined equally-weighted key performance targets include the total shareholder return (TSR) of the UNIQA ordinary share compared with the TSR of the shares in the companies on the DJ EURO STOXX TMI Insurance, the P&C Net Combined Ratio in UNIQA's property and casualty business and the return on risk capital (the return on equity required).

The programme stipulates annual investments in UNIQA shares with a holding period also of four years in each case.

The cash settlement is calculated as follows for each tranche of shares: $\text{payment} = A \times B \times C$

A = number of virtual shares awarded for the performance period.

B = average price of the UNIQA ordinary share in the period of six months before the end of the performance period.

C = degree of target achievement at the end of the performance period. The maximum target achievement is 200 per cent.

The fair value on the date that share-based payment awards are granted is recognised as expense over the period in which the unconditional entitlement to the award is obtained. The fair value is based on expectations with respect to achievement of the defined key performance targets. Changes in measurement assumptions result in an adjustment of the recognised provision amounts affecting income. Obligations from share-based remuneration are stated under "Other provisions".

As at 31 December 2020 a total of 1,139,469 virtual shares (2019: 1,066,194 shares) were relevant for the measurement. The fair value of share-based remuneration (excluding non-wage labour costs) at the reporting date amounts to €3,993 thousand (2019: €7,169 thousand).

32. Relationships with related companies and persons

Companies in the UNIQA Group maintain various relationships with related companies and persons.

Related companies refer to companies which exercise either a controlling or a significant influence on UNIQA.

The group of related companies also includes the non-consolidated subsidiaries, associates and joint ventures of UNIQA.

Related persons include the members of management holding key positions along with their close family members. This covers in particular the members of management in key positions at those companies which exercise either a controlling or a significant influence on the UNIQA Group, along with their close family members.

33. Other financial obligations and contingent liabilities

Options to purchase granted

There were bilateral option agreements in place between UNIQA and the two remaining non-controlling shareholders in UNIQA Insurance Company, Private Joint Stock Company (Kiev, Ukraine) to acquire (call option for UNIQA) or to sell (put option for the non-controlling shareholders) the non-controlling shares based on pre-agreed purchase price formulas by 30 June 2020 at the latest. UNIQA exercised the call option in June 2020 and as a result it will owe 100 per cent of the shares in both UNIQA companies in Ukraine following a successful share transfer (expected in the first quarter of 2021).

There is also the possibility to acquire the company shares held by the minority shareholders through exercising a mutual option between UNIQA and the minority shareholders in the SIGAL Group based on previously agreed purchase price formulas. A new option period was agreed by extending the previous shareholders' agreement, with the exercise period agreed to be from 1 July 2023 to 30 June 2024.

34. Expenses for the auditor of the financial statements

The auditor fees in the financial year were €2.340 thousand (2019: €2,439 thousand); of which €386 thousand (2019: €369 thousand) is attributable to the annual audit, €1.660 thousand (2019: €1,146 thousand) to other auditing services and €294 thousand (2019: €924 thousand) to other general services.

35. Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by UNIQA. UNIQA is regarded as controlling an entity if:

- UNIQA is able to exercise power over the relevant entity,
- UNIQA is exposed to fluctuating returns from its participation, and
- UNIQA is able to influence the amount of the returns as a result of the power it exercises.

The financial statements of subsidiaries are included in the consolidated financial statements from the date control begins until the date control ends.

Loss of control

If UNIQA loses control over a subsidiary, the subsidiary's assets and liabilities and all associated non-controlling interests and other equity components are deleted from the accounts. Any resulting profit or loss is recognised in profit/(loss) for the period. Any retained shares in the former subsidiary is measured at fair value at the date of the loss of control.

Investment in associates

Associates are all the entities over which UNIQA has significant influence but does not exercise control or joint control over their financial and operating policies. This is generally the case as soon as there is a voting share of between 20 and 50 per cent or a comparable significant influence is guaranteed legally or in practice via other contractual regulations. Inclusion in the basis of consolidation is based on the proportionate equity (equity method).

Pension and investment funds

Controlled pension and investment funds are included in the consolidation unless the relevant fund volumes were considered to be immaterial when viewed separately and as a whole. A fund is regarded as controlled if:

- UNIQA determines the relevant activities of the fund, such as the definition of the investment strategy and short and medium-term investment decisions,
- UNIQA has the risk of and the rights to variable successes of the fund in the form of distributions and participates in the performance of the fund assets, and
- the determining power over the relevant activities is exercised in the interest of UNIQA by determining the investment objectives and the individual investment decisions.

Basis of consolidation

31/12/2020 31/12/2019

Consolidated companies		
Austria	33	33
Other countries	66	57
Associates		
Austria	4	5
Other countries	1	1
Consolidated pension and investment funds		
Austria	5	6
Other countries	6	1

Shares in subsidiaries that are not consolidated, associates as well as joint ventures that are not accounted for using the equity method are classified as financial assets available for sale and stated under the item “Other investments”.

36. Consolidation principles**Transactions eliminated on consolidation**

Intragroup balances and transactions and all income and expenses from intragroup transactions are eliminated when consolidated financial statements are prepared.

Initial consolidation

UNIQA Ventures GmbH (Vienna) and City One Park Sp. z o.o. (Warsaw, Poland) were consolidated for the first time in the first quarter of 2020. Poland, Warsaw.

Acquisitions

In addition to the acquired AXA companies in Poland, the Czech Republic and Slovakia described in the Chapter “Business combinations”, 85 per cent of the shares in

Treimorfa Project Sp. z o.o. (Krakow, Poland) were acquired in the second quarter of 2020. UNIQA 5 Star GmbH (Vienna) (previously: SASR Alpha Sieben- undfünfzigste Beteiligungsverwaltung GmbH) was acquired in the third quarter of 2020. The acquisitions of Treimorfa Project Sp. z o.o. and UNIQA 5 Star GmbH do not represent a business combination within the meaning of IFRS 3.

Restructuring processes

UNIQA International AG (Vienna) as assigning company was merged in the fourth quarter with UNIQA Österreich Versicherungen AG (Vienna) as acquiring company with retroactive effect from 1 January 2020.

PremiQaMed Management Services GmbH (Vienna) was merged in the third quarter of 2020 with PremiQaMed Holding GmbH (Vienna) as acquiring company.

In the fourth quarter of 2020, UNIQA Real Estate d.o.o. (Belgrade, Serbia) was merged with Renaissance Plaza d.o.o. (Belgrade, Serbia) as the acquiring company.

Sales

The 25 per cent shareholding in SK Versicherung Aktiengesellschaft (Vienna) was sold in September 2020.

Deconsolidation

The fully consolidated investment fund UNIQA Diversified Bond Fund was deconsolidated on 19 October 2020.

37. Changes in major accounting policies as well as new and amended standards

With the exception of the following changes, the outlined accounting policies were consistently applied to all periods presented in these consolidated financial statements.

Amendments and standards to be applied for the first time

The Group applied the following amendments to standards with the initial application date of 1 January 2020. None of the new regulations arising from this have any essential impact on UNIQA's assets, liabilities, financial position and profit or loss.

Standard	Content	First-time application by UNIQA	Impact on UNIQA
Miscellaneous	Updated Framework	1 January 2020	Yes
IFRS 3	Definition of a Business – Amendments to IFRS 3	1 January 2020	Yes
IAS 1, IAS 8	Definition of Material – Amendments to IAS 1 and IAS 8	1 January 2020	Yes
IFRS 9, IAS 39, IFRS 7	Amendments to IFRS 9, IAS 39 and IFRS 7: Interest Rate Benchmark Reform	1 January 2020	Yes

New and amended standards to be applied in the future

The IASB has also published a range of new standards that will be applicable in the future. UNIQA does not intend to adopt these standards early.

Standard	Content	First-time application by UNIQA	Endorsement by the EU at 31 December 2020	Likely to be relevant for UNIQA
New standards				
IFRS 9	Financial Instruments	1 January 2023 ¹⁾	Yes	Yes
IFRS 9	Amendments to IFRS 9 – Prepayment Features with Negative Compensation	1 January 2023 ¹⁾	Yes	Yes
IFRS 17	Insurance Contracts	1 January 2023 ¹⁾	No	Yes
Amended standards				
IAS 1	Amendments to IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Non-Current	1 January 2022	No	Yes
IFRS 16	Amendments to IFRS 16 Leases: Covid-19-Related Rent Concessions	1 June 2020	Yes	Yes
IFRS 4, IFRS 9	Amendments to IFRS 4 Insurance Contracts: Extension of the Temporary Exemption from Applying IFRS 9	1 January 2021	No	Yes

¹⁾ Preliminary decision of the IASB to defer the date of IFRS 17 coming into force and to extend the temporary exemption of IFRS 9 by one year

The following standards to be applied in future are expected to have a significant impact on reporting at UNIQA:

IFRS 9 – Financial Instruments

Since UNIQA's business is predominantly insurance-related and UNIQA has not yet adopted IFRS 9 in any other version, a deferral to apply IFRS 9 for the first time is permitted until 1 January 2023 (see Footnote 1 to the table above). The use of UNIQA's deferral approach requires the publication of additional information in the notes for the period up to the first-time application of IFRS 9.

Classification and measurement

The future classification and measurement of financial assets under IFRS 9 is derived from the business model criterion and the SPPI criterion (solely payments of principal and interest). Depending on the principle-based classification rules, IFRS 9 requires that subsequent measurement be carried out at amortised cost or at fair value.

UNIQA has already completed the technical development and implementation of an IT-system-based assessment of the SPPI criterion for the entire portfolio of relevant assets.

Fixed-income securities make up a large portion of the investment portfolio. Given that these securities tend to follow the principal/interest payment structure in most cases, they largely fulfil the criteria of the SPPI test. If an instrument meets the requirements of the SPPI test, there are two options: it can then be measured at amortised cost, or it can be measured at fair value through other comprehensive income. The portion of the UNIQA portfolio that does not fulfil the SPPI criteria will in future be measured at fair value through profit or loss.

Requirements for SPPI fulfilled based on carrying amounts in per cent¹⁾

	Variable-income securities	Fixed-income securities	Loans and other investments	Derivative financial instruments	Investments under investment contracts
Financial assets at fair value through profit or loss	0.0	0.1	-	0.0	0.0
Available-for-sale financial assets	0.0	90.7	-	-	-
Loans and receivables	-	0.4	99.5	-	-
Total	0.0	91.2	99.5	0.0	0.0

¹⁾ Classification according to IAS 39

Asset allocation of other investments

In € thousand

	At amortised cost or at fair value through other comprehensive income			At fair value through profit or loss		
	Carrying amount	Fair value	Change in fair value over the period	Carrying amount	Fair value	Change in fair value over the period
Government bonds	11,639,942	11,541,953	1,559,196	6,780	6,693	-477
Corporate bonds	3,486,221	3,471,831	92,482	130,817	131,564	-81,708
Covered bonds	2,141,159	2,120,240	-550,742	0	0	0
Loans	128,335	127,663	0	1,934	1,850	0
Other	0	0	0	1,546,285	1,545,774	645,790
Total	17,395,657	17,261,688	1,100,936	1,685,817	1,685,881	563,605

In addition, the logic of the business models was created in accordance with IFRS 9. Based on current indications, a large part of UNIQA's business is classified under the hold-and-sell business model. This may result in changes due to the interactions with IFRS 17 that cannot yet be fully assessed at the time the financial statements are being prepared.

Impairment

The new provisions of IFRS 9 concerning impairment must be applied in future to financial assets measured at amortised cost or at fair value through other comprehensive income. Under IFRS 9, the impairment calculation to

be applied is based on a forward-looking model for the recognition of expected credit losses.

The model logic used to determine expected credit losses has been implemented in the IT systems and will be tested until initial application of IFRS 9. For the purpose of assessing the default risk, recourse was made to the definition in IFRS 9 of financial instruments with a low default risk at the reporting date. An external investment grade rating can therefore be used to assess whether a financial instrument has a low default risk.

Financial instruments by rating

In € thousand

	Government bonds	Corporate bonds	Covered bonds	Loans	Other	Total
AAA	2,246,890	72,462	1,369,367	0	0	3,688,718

Not rated	68,097	444,016	82,099	118,224	0	712,437
Total	11,639,942	3,486,221	2,141,159	128,335	0	17,395,657

The fair value of the instruments which do not feature a low default risk (non-investment grade) amounts to €685 million.

UNIQA expects effects from the conversion to IFRS 9 both as a result of the new classification and measurement

rules and due to the new impairment model. In this regard, possible initial application and subsequent measurement effects are to be expected in the category “Variable-income securities” in particular, as these financial assets will have to be measured at fair value through profit or loss in future. In a holistic view, interactions with IFRS 17 must also be taken into account in this context. For the further course of the project, the focus is on the parallel phase in order to analyse the financial effects of the differences between IAS 39 and IFRS 9 even further.

IFRS 17 – Insurance Contracts

The IASB (International Accounting Standards Board) decided on 17 March 2020 to postpone the date of initial application of IFRS 17 by two years from 1 January 2021 to 1 January 2023. The IASB also decided to align the effective date for IFRS 9 for insurance companies with IFRS 17 to 1 January 2023. At the next stage, the EFRAG (European Financial Reporting Advisory Group) will work on the recommendation to the European Commission regarding the adoption of IFRS 17 into EU law. IFRS 17 establishes principles relating to recognition, measurement, presentation and disclosures of insurance contracts.

An essential element of the standard is a general measurement model, according to which all insurance contracts are to be valued on the basis of a prospective model. This involves combining current values (best estimate cash flows) plus a risk margin with a mode for distributing the future profit from the contracts (contractual service margin).

The contractual service margin is the equivalent of the expected future profit from contracts held in the respective portfolio and thus creates a high degree of transparency with regard to UNIQA’s future profitability. This margin is a residual figure and its amount depends significantly on the best estimate of future cash flows, the discount rate and the method used to determine the risk margin.

For short-term insurance contracts, there is an option to use a simplified measurement model. UNIQA will primarily value and account for insurance contracts from the property and casualty insurance area based on the premium allocation approach.

There is a mandatory special model (variable fee approach) for participating contracts and contracts of unit-linked and index-linked life insurance. The variable

fee approach is expected to be applied at UNIQA in health insurance and in life insurance.

For both, the general measurement model and the variable fee approach, UNIQA assumes at the time of publication of the Group report that the so-called OCI option will be applied where the respective allocated financial instruments on the asset side are also measured through other comprehensive income. The objective of applying this option is to reduce volatility in the financial position and income statement.

Since IFRS 17 is expected to lead to significant changes in the accounting and measurement of UNIQA’s core business, a separate project team consisting of actuaries, accountants, controllers and IT experts has been appointed, and it reports to a central programme management. This organisation was set up concurrently in all affected UNIQA subsidiaries in order to provide support in defining the requirements of the respective local characteristics and the product features for the entire UNIQA Group.

In order to adequately reflect the complexity of the standard, UNIQA decided to implement an insurance subledger. In the course of its implementation, characteristic sample business transactions, so-called use cases, were developed for all existing product groups in the entire UNIQA portfolio. These sample business transactions reflect the technical interpretation of IFRS 17 from UNIQA’s point of view and illustrate the configuration plan for the insurance subledger. They are the core of the new software solution.

The sample business transactions were created in close cooperation with the actuaries, accountants and the technical implementation team and shared with the UNIQA Group subsidiaries in a two-stage feedback process. In the course of numerous workshops and feedback rounds, specific features of the product landscapes of the individual subsidiaries were updated and integrated in the pool of use cases. The functional and technical design of the core of the reporting and process environment required under IFRS 17 was continued in the 2020 financial year.

In addition to the use cases, various IFRS 17 technical concepts in the actuarial and accounting areas were shared with the subsidiaries in 2020 and expanded to include their features and specifics. The integration and preparation of the data required for the measurement of

and accounting for insurance contracts represents a key challenge in implementing IFRS 17. Significant progress was achieved here in the 2020 financial year.

The effects and interaction of IFRS 9 and IFRS 17 on the financial position and income statement of selected UNIQA companies were analysed in the past financial year. This analysis was based on several simplifications and assumptions. For example, in health and life insurance business lines, the future expected cash flows were based on the results of the market consistent embedded value (MCEV). In addition, an approximate cost allocation according to IFRS 17 was applied in the analysis. A simplified approach was also used to derive the risk adjustment.

Despite simplifications and estimates, important lessons have been learned:

- The comparability of IFRS 4 and IFRS 17 is limited due to the fundamental differences between the two accounting standards.
- Despite certain similarities with the solvency regulations under Solvency II, the interpretation of the results according to IFRS 17 is a great challenge due to the significantly increased complexity. In addition, the parameters for measuring the success of the company will change and new indicators such as the contractual service margin or loss component will be added.
- In order to ensure that the measurement of insurance contracts is in accordance with the provisions of IFRS 17, much larger volumes of data need be processed and validated compared to IFRS 4.

In the course of the impact analysis, all three measurement models described above (general measurement model, variable fee approach and premium allocation approach) were applied specifically to the portfolio of selected UNIQA companies. Due to the continued limited scope of this impact analysis, no conclusions can be drawn regarding the impact of IFRS 17 on the Group as a whole.

38. Error correction and change in accounting policies pursuant to IAS 8

A change in the impairment test model

A change in the impairment test model results in an impairment of goodwill allocated to CGU Bulgaria and Romania in the amount of €54,600 thousand for the 2019 financial year. In the revised impairment test the determination of the cash flow in the perpetuity and the discount rate has been adjusted.

The adjustment is implemented based on an audit by the Austrian Audit Agency for Financial Reporting (OePR). This showed that the growth assumptions used in the model and the discount rates also need to be changed.

Following review and evaluation of these findings by UNIQA Insurance Group AG, there is an impairment of goodwill of CGU Bulgaria in the amount of €19,200 thousand and of CGU Romania in the amount of €35,400 thousand.

Adjustments of deferred profit participation

In preparation for the initial application of IFRS 17 (Insurance Contracts) which is to be applied from 1 January 2023, it was discovered that deferred profit participation was not accounted for in health insurance. Due to this error correction, a provision for deferred profit participation is being recognised – with retroactive effect from 1 January 2019 – for contracts in health insurance that involve profit participation. The amount of the provision for the deferred profit participation is determined by taking into account the amounts from endowed profit participations deducted in previous years. In the course of this correction the same content is also being changed retroactively in the accounting method for life insurance, in order to achieve a uniform presentation. For this purpose – as in health insurance – a deduction of the endowed profit participations of the previous years is made. The corrections and changes in accounting policies relate exclusively to the UNIQA Austria segment.

39. Currency translation**Functional currency and reporting currency**

The items included in the financial statements for each operating subsidiary are measured based on the currency that corresponds with the currency of the primary economic environment in which the subsidiary operates (functional currency). The consolidated financial statements are prepared in euros which is UNIQA's reporting currency.

Transactions in foreign currencies

Transactions in foreign currencies are translated into the functional currency of the Group entity at the exchange rate on the date of the transaction or, in the case of re-measurement, at the time of measurement.

Monetary assets and liabilities denominated in a foreign currency on the reporting date are translated into the functional currency at the closing rate. Non-monetary assets and liabilities measured at fair value in a foreign currency are translated at the rate valid on the date the fair value is calculated. Currency translation differences are generally recognised in profit/(loss) for the period. Non-monetary items recognised in a foreign currency at historical cost are stated with the historical exchange rate. This results in no currency translation difference.

Currency translation differences from equity instruments available for sale are recognised in other comprehensive income by way of derogation from the general principle. An exception to this are impairments for which currency translation differences are reclassified from other comprehensive income to profit/(loss) for the period.

Foreign operations

Assets and liabilities from foreign operations, including the goodwill and fair value adjustments that result from the acquisition, are translated into euros at the closing rate on the reporting date. Income and expenses from foreign operations are translated at the monthly closing rates.

Currency translation differences are reported in other comprehensive income and recognised in equity as a part of the accumulated profits in the item "Differences from currency translation" if the foreign exchange difference is not attributable to non-controlling interests. Currency translation differences from the share of the carrying amount in the consolidated income statement and attributable to the amortised cost are recognised in the item "Available-for-sale financial assets".

Major exchange rates

	EUR closing rates		EUR average rates	
	31/12/2020	31/12/2019	1–12/2020	1–12/2019

US dollar (USD)	1.2271	1.1234	1.1452	1.1214

Significant events after the reporting date

In early March 2021, the Austrian Supreme Court ruled in favour of the insurance industry in connection with business interruptions arising from Covid-19. In this decision, the Court clarified that a coverage obligation on the part of the insurer from the business interruption caused by the epidemic only applies in the case of a business closed due to the Austrian Epidemic Act, but not based on a ban on entry and access ordered under the Austrian Covid-19 Measures Act. This is expected to have a positive impact on claim payments in the 2021 financial year.

Risk Report

40. Risk strategy

Principles

UNIQA's strategic objectives are directly linked to the company's risk strategy. The cornerstones of the risk strategy are based on the business strategy and the risks it entails. A clear definition of the risk preference creates the foundation for all business policy decisions.

Organisation

UNIQA's core business is to relieve customers of risk, pool the risk to reduce it and thereby generate profit for the company. The focus is on understanding risks and their particular features. To ensure a strong focus on risk, UNIQA has created a separate risk function on the Group's Management Board with a Group Chief Risk Officer (CRO) who is also acting concurrently as Group Chief Financial Officer (CFO). In the Group companies, the Chief Risk Officer is also a part of the Management Board. This ensures that decision-making is risk-based in all relevant bodies. UNIQA has established processes that make it possible to identify, analyse and manage risks.

The risk profile is regularly validated at all levels of the hierarchy and discussions are held in specially instituted committees with the members of the Management Board. Internal and external sources are consulted to obtain a complete picture of the risk situation. UNIQA regularly checks for new threats both in the Group and in the subsidiaries.

Risk-bearing capacity and risk appetite

UNIQA assumes risk in full awareness of its risk-bearing capacity. This is defined as the capacity to absorb potential losses from extreme events so that medium- and long-term objectives are not put in danger.

The Solvency Capital Requirement (SCR) is at the centre of risk-related decisions. The SCR corresponds with a company-specific risk assessment based on a partial internal model for market risks and non-life risks, as well as on the standard model according to Solvency II for the other risk categories. As such, it corresponds with the regulatory risk calculations under the Solvency II framework. We are aiming for risk capital cover (capital requirement ratio) of more than 170 per cent based on this approach. Immediate steps will be taken to improve the capital position if the marginal value falls below 135 per cent. Details for the reporting date as at 31 December 2020, including a detailed analysis of changes, can be found in the "Group Capital" presentation.

Non-quantifiable risks, in particular operational risk, litigation risk and strategic risk are identified and assessed as part of the risk assessment process. This assessment is then used as the basis for implementing any necessary risk mitigation measures.

UNIQA's risk strategy specifies the risks the company intends to assume and those it plans to avoid. Within the scope of the strategy process, risk appetite is defined based on UNIQA's risk-bearing capacity. This risk appetite is then used to determine tolerances and limits, which provide a sufficient early warning system for the company to initiate prompt corrective action in the event of any deviation from targets. UNIQA counters risks that fall outside the defined risk appetite, such as reputational risk, with proactive measures, transparency and careful assessment.

Opportunities

Risk also means opportunity. UNIQA analyses trends and risks that influence the society and thus customers and the company itself. Employees throughout the company are involved in order to recognise and analyse trends at an early stage, produce suitable action plans and develop innovative approaches.

41. Risk management system

The focus of risk management with management structures and defined processes is the attainment of UNIQA's and its Group companies' strategic goals.

UNIQA's Risk Management Guidelines form the basis for a uniform standard at various company levels. The guidelines are approved by the CFO/CRO and the Group Executive Board and describe the minimum requirements in terms of organisational structure and process structure.

In addition to the Group Risk Management Guidelines, similar guidelines have also been prepared and approved for the Group companies. The Risk Management Guidelines at company level were approved by the Management Board of the UNIQA Group companies and are consistent with UNIQA's Risk Management Guidelines.

Organisational structure (governance)

The detailed setup of the process and organisational structure of risk management is set out in UNIQA's Risk Management Guidelines. They reflect the principles embodied in the concept of "three lines of defence" and the clear differences between the individual lines of defence.

First line of defence: risk management within the business activity

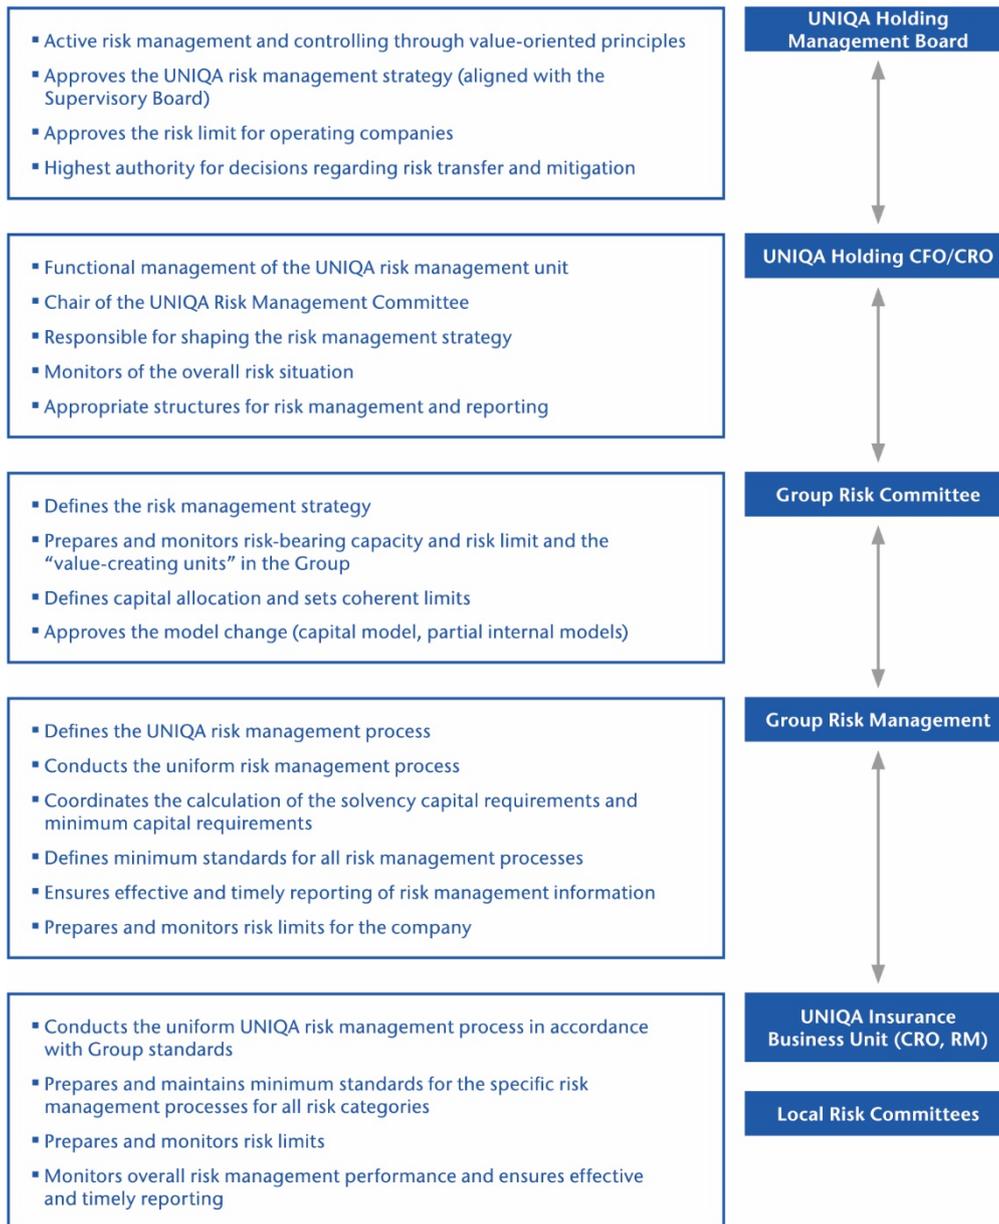

Those responsible for business activities must develop and put into practice an appropriate risk control environment to identify and monitor the risks that arise in connection with the business and processes.

Second line of defence: supervisory functions including risk management functions

The risk management function and the supervisory functions, such as controlling, must monitor business activities without encroaching on operational activities.

Third line of defence: internal audit

This enables an independent review of the formation and effectiveness of the entire internal control system, which comprises risk management and compliance (e.g. internal auditing).

The relevant responsibilities are shown accordingly in the overview above. In addition, the Supervisory Board at UNIQA Insurance Group AG receives comprehensive risk reports at Supervisory Board meetings.

Risk management process

UNIQA’s risk management process delivers periodic information about the risk profile and enables the top management to make the decisions for the long-term achievement of objectives.

The process concentrates on risks relevant to the company and is defined for the following classes of risk:

- Market risk/Asset-Liability Management risk (ALM risk)
- Credit risk/default risk
- Liquidity risk
- Concentration risk
- Underwriting risk (property and casualty insurance, health and life insurance)
- Operational risk
- Emerging risk
- Reputational risk
- Contagion risk
- Strategic risk

A Group-wide, standardised risk management process regularly identifies, evaluates and reports on risks to UNIQA and its Group companies within these categories of risk.

Risk identification is the starting point for the risk management process, systematically recording all major risks and describing them in as much detail as possible. In order to conduct as complete a risk identification as possible, different approaches are used in parallel, and all categories of risk, subsidiaries, processes and systems are included.

The risk categories of market risk, underwriting risk and default risk are evaluated at UNIQA by means of quantitative methods either based on the Solvency II standard approach or the partial internal model (for non-life or market risks). Furthermore, risk drivers are identified for the results from the standard approach, and analysed to assess whether the risk situation is adequately represented (in accordance with the Company's Own Risk and Solvency Assessment (ORSA)). All other categories of risk are evaluated quantitatively or qualitatively with their own risk scenarios.

42. Activities and objectives in 2020

Based on external and internal developments, activities in 2020 focused on the following:

- Covid-19
- AXA integration
- Review of Solvency II (holistic impact assessment)
- GRC tool implementation

The world was affected by the global Covid-19 pandemic earlier this year, and this has had a significant impact on many nations around the world, on the global economic system and, as a result, on the solvency position of insurance companies. UNIQA therefore set up a crisis management team in which a group of experts from different areas regularly monitors developments associated with the spread of the coronavirus as well as the effects on UNIQA in order to be able to make decisions and implement the corresponding measures. The challenge of having all employees work remotely was mastered within a very short time, meaning that business was able to continue with almost no problems. The crisis management team continues to monitor further developments with the pandemic in order to be able to implement measures at short notice if necessary.

Due to strong capitalisation in recent years, UNIQA already actively expressed its interest and willingness some time ago to make an acquisition in its core markets in Central and Eastern Europe. On 7 February 2020 UNIQA officially announced the acquisition of AXA's subsidiaries in Poland, the Czech Republic and Slovakia, which was completed on 15 October 2020. This transaction involving the AXA subsidiaries significantly increased UNIQA's market share and led UNIQA to become the fifth largest player in the CEE market. The preparations and activities for integrating the processes and employees from the new companies into the UNIQA Group began in 2020. This topic continues to affect UNIQA in the fourth quarter of 2020 and beyond, with a merger of the AXA companies with the UNIQA companies being the next step planned. As stated above, the greatest challenge will be the integration of all the processes, employees and IT systems.

As in the previous year, the topic of the Solvency II Review continued to occupy UNIQA in 2020. The European Insurance and Occupational Pensions Authority (EIOPA) already published extensive consultation papers in 2019, containing a total of 19 topics divided into two consultation waves. These waves dealt with both qualitative (e.g. Group supervision, macro-prudential issues, reporting and disclosure) and quantitative topics (e.g. risk-free rate, risk margin, SCR, own funds). Although the review of Solvency II is not binding in nature, the initial proposals already determine the direction in which the entire Solvency II framework may change. EIOPA carried out two holistic impact assessments in 2020 on this topic in order to gain an overview of the quantitative impact of the proposals. UNIQA took part in these assessments. There is therefore a project in place with a group of experts analysing the impact of this review on the company. This will enable UNIQA to prepare for upcoming changes in good time and mitigate the risk of being unable to meet future regulatory requirements.

UNIQA has been working intensively on expanding the concept of its internal control system (ICS) in recent years. The primary focus in 2020 was on creating an IT solution for this. A Governance, Risk & Compliance (GRC) tool was introduced in order to support implementation of the ICS through the systems. The challenge here in particular was in the conceptual coordination of four areas (compliance, security management, data protection and risk management) and then reflecting this in the tool.

43. Challenges and priorities in risk management for 2021

Capital market environment

The current capital market environment is a topic that will continue to occupy UNIQA in 2021. Last year was also characterised by a low interest rate environment. In addition, the Covid-19 pandemic caused interest rates to drop sharply in early 2020 along with a strong increase in spreads and losses on the equity markets. The stock markets saw some of the most dramatic daily losses in history. The risk premiums (spreads) – in particular but not only for corporate bonds – rose sharply and recorded movements in some cases similar to those during the financial crisis of 2008–2009. Interest rates reached almost historic lows. Even though the situation has stabilised at present and the worst seems to be over for the moment, the overall situation and further developments still entail a good deal of uncertainty. This topic therefore represents a major challenge for UNIQA. UNIQA will continue to monitor the capital market environment closely in 2021 in order to be able to respond quickly to potential movements (triggered e.g. by another wave of Covid-19).

Sustainability

Sustainability is one of the topics that has become increasingly important in recent years, both in the applicable regulations as well as in terms of public perception. UNIQA established a separate group for this topic in the “HR & Brand” Management Board department at the beginning of 2020 in order to account for this trend. The focus for risk management is particularly on managing and handling sustainability risks. A working group was set up for this reason with the objective of monitoring the various developments in the area of sustainability regulation and analysing the impact on the risk management system. The output of this working group and main focus in 2021 will be on incorporating the new aspects of the requirements into the internal processes, internal regulations and reporting.

Further development of the internal model

In October 2020, the decision was taken to develop UNIQA’s partial internal model into a full internal model over the next few years. With the approval of the market risk PIM approximately 80 per cent of the risk profile is already covered by the partial internal model. The plan is to replace the remaining 20 per cent currently still modelled using the standard formula with an internal model. This would make UNIQA the first Austrian insurance group to have a full internal model. This project is designed to be a multi-year project that will continue beyond 2021.

GRC tool rollout

As mentioned in the section on activities, a GRC tool has been set up as a central instrument for managing operational risk. Rolling it out across the entire Group will be one of the focal points and challenges in 2021. The focus on the one hand will be on the fact that the relevant employees must be trained to work with the tool, and on the other hand that the data must be migrated into this new system.

44. Risk profile

UNIQA’s risk profile is very heavily influenced by the life and health insurance portfolios of UNIQA Österreich Versicherungen AG. This situation means that market risk plays a central role in UNIQA’s risk profile.

The Group companies in Central Europe operate in the property and casualty business lines as well as in the life and health insurance business lines. In the CEE region, the property and casualty sectors are the most dominant.

This structure is important to UNIQA, because it offers a high level of diversification from the life and health insurance lines that dominate in the Austrian companies.

The distinctive risk features of the regions are also reflected in the risk profiles determined by using the internal measurement approach.

Market and credit risk

The strength of the market and credit risks depends on the structure of the capital investment and its allocation to the different asset categories. The table below shows investments classified by asset category.

Asset allocation

In € thousand

31/12/2020 31/12/2019

Fixed-income securities	17,577,469	16,473,243
Real estate assets	1,219,213	1,137,444
Pension fund	1,373,557	834,227
Equity investments and other stocks	822,476	794,450
Shares and equity funds	840,135	765,038
Time deposits	279,315	384,762
Other investments	207,077	235,631
Total	22,319,241	20,624,797

However, the market and credit risks not only have an impact on the value of investments, but also influence the level of technical liabilities. Thus, there is – particularly in life insurance – a dependence between the (price) growth of assets and liabilities from insurance contracts. UNIQA manages the income expectations and risks of assets and liabilities arising from insurance contracts as part of the asset liability management (ALM) process. The objective is to ensure sufficient liquidity while retaining the greatest possible security and balanced risk in order to achieve a return on capital that is sustainably higher than the guaranteed performance of the technical liabilities. To do this, assets and liabilities are allocated to different accounting groups.

The following two tables show the main accounting groups generated by the various product categories.

Assets	31/12/2020	31/12/2019
In € thousand		
Long-term life insurance contracts with guaranteed interest and profit participation	12,565,453	12,251,003
Long-term unit-linked and index-linked life insurance contracts	4,238,569	4,680,403
Long-term health insurance contracts	4,434,179	4,068,651
Short-term property and casualty insurance contracts	5,577,045	5,073,948
Total	26,815,246	26,074,005

These values refer to the following items:

- Land and buildings for own use
- Investment property
- Financial assets accounted for using the equity method
- Other investments
- Unit-linked and index-linked life insurance investments
- Cash and cash equivalents

Technical provisions and liabilities (net)	31/12/2020	31/12/2019
In € thousand		
Long-term life insurance contracts with guaranteed interest and profit participation	11,243,000	11,143,552
Long-term unit-linked and index-linked life insurance contracts	4,208,512	4,646,152
Long-term health insurance contracts	3,519,993	3,359,589
Short-term property and casualty insurance contracts	3,147,659	3,061,309
Total	22,119,164	22,210,602

These values refer to the following items:

- Technical provisions
- Technical provisions for unit-linked and index-linked life insurance
- Reinsurance liabilities (only securities account liabilities from reinsurance ceded)
- Reinsurers' share of technical provisions
- Reinsurers' share of technical provisions for unit-linked and index-linked life insurance

The market and credit risk is broken down into interest rate, credit spread, equity, currency and market concentration risk.

The **interest rate risk** arises on all asset and liability items of the statement of financial position whose value fluctuates as a result of changes in risk-free yield curves or associated volatility. Given the high proportion of interest-bearing securities in the assets, interest rate risk forms an important part of market risk. The interest rate risk is actively managed as part of the ALM-based investment strategy.

The following table shows the maturity structure of fixed-income securities.

Exposure by term

In € thousand

31/12/2020 31/12/2019

	31/12/2020	31/12/2019
Up to 1 year	975,698	673,476
More than 1 year up to 3 years	1,668,822	1,888,393
More than 3 years up to 5 years	2,307,840	2,468,311
More than 5 years up to 7 years	2,579,998	2,323,011
More than 7 years up to 10 years	2,863,478	3,067,014
More than 10 years up to 15 years	2,635,322	2,503,197
More than 15 years	4,546,309	3,549,841
Total	17,577,469	16,473,243

In comparison with this, the next table shows the insurance provision before reinsurance in health and life insurance and the gross provision for unsettled claims in non-life insurance, broken down into annual brackets. In health and life insurance the breakdown takes place using expected cash flows from the ALM process.

IFRS reserve by expected maturity date

In € thousand

31/12/2020 31/12/2019

	31/12/2020	31/12/2019

More than 3 years up to 5 years	1,290,754	994,309
More than 5 years up to 7 years	1,074,151	1,127,128
More than 7 years up to 10 years	1,453,751	1,490,459
More than 10 years up to 15 years	2,233,169	2,433,869
More than 15 years	8,002,000	7,226,506
Total	16,191,540	15,490,785

Since the interest rate risk is particularly relevant in life insurance as a result of the long-term liabilities, the focus below is placed on this segment. Using UNIQA Österreich Versicherungen AG as an example, the average interest rate sensitivity of life insurance in the event of a change in interest rates of +/-50 basis points for the assets is €524.0 million, and that of liabilities €655.0 million. The difference between these two values is used as the control basis for the interest rate risk or the duration gap. During the annual ALM process, it is determined from a strategic point of view which budgets for interest rate risk can be accepted at the operating company level.

The discount rate that may be used in the costing when new business is written in most UNIQA companies takes into account a maximum discount rate imposed by the relevant local supervisory authority. In all those countries in which the maximum permissible discount rate is not

imposed in this way, appropriate prudent, market-based assumptions are made by the actuaries responsible for the calculation. In our core market of Austria, the maximum interest rate beginning 1 January 2017 is 0.5 per cent per year. However, the portfolio also includes older contracts with different discount rates. In the relevant markets of the UNIQA Group, these rates amount to as much as 4.0 per cent per year. The following table provides an overview of the average technical discount rates by region and currency.

Average technical discount rates, core business by region and currency

In per cent

	EUR	USD	Local currency
Austria (AT)	2.2		
Central Europe (CE)	3.3		3.0
Eastern Europe (EE)	3.4	3.5	3.2
Southeastern Europe (SEE)	2.2	1.7	0.6
Russia (RU)	2.5	2.5	4.0

As these interest rates are guaranteed by the insurance company, the financial risk lies in not being able to generate these returns. Since classic life insurance business predominantly invests in interest-bearing securities, the unpredictability of long-term interest rate trends is the most significant financial risk for a life insurance company. Investment and reinvestment risk arises from the fact that premiums received in the future must be invested to achieve the rate of return guaranteed when a policy is written. However, it is entirely possible that no appropriate securities will be available at the time the premium is received. Likewise, future income must be reinvested to achieve a return equivalent to at least the original discount rate. For this reason, UNIQA has already decided to only offer products in its key markets that are based on a low or zero discount rate. One example of this in Austria is the sale of deferred pension products with a discount rate of 0.0 per cent.

The **credit spread risk** refers to the risk of changes in the price of asset or liability items in the financial statement, as a consequence of changes in credit risk premiums or associated volatility, and is ascertained for individual securities in accordance with their rating and duration. When investing in securities, UNIQA chooses securities with a wide variety of ratings, taking into consideration the potential risks and returns.

The following table shows the credit quality of those fixed-income securities that are neither overdue nor written down, based on their ratings.

Equity risk arises from movements in the value of equities and similar investments as a result of fluctuations in international stock markets, and therefore, stems in particular from the asset categories “Equity investments and other stocks” and “Equities”. The effective equity weighting is controlled by hedging with the selective use of derivative financial instruments.

Foreign currency risk is caused by fluctuations in exchange rates and associated volatility. Given the international nature of the insurance business, UNIQA invests in securities denominated in different currencies, thus following the principle of ensuring matching liabilities with assets in the same currency to cover liabilities at the coverage fund or company level. Despite the selective use of derivative financial instruments for hedging purposes, it is not always possible on cost grounds or from an investment point of view to achieve complete and targeted currency matching between the assets and liabilities. The following tables show a breakdown of assets and liabilities by currency.

Currency risk	31/12/2020

In addition to figures from the established market and credit risk models (MCEV, SCR, etc.), stress tests and sensitivity analyses are used to measure and manage market and credit risk and their components.

The following tables show the most important market risks in the form of key sensitivity figures, along with their impact on equity and profit/(loss) for the period. Depending on the measurement principle to be applied, any future losses from the measurement at fair value may result in different fluctuations in profit/(loss) for the period or in other comprehensive income. The key figures are calculated theoretically on the basis of actuarial principles and do not take into consideration any diversification effects between the individual market risks or countermeasures taken in the various market scenarios.

Sensitivities for other investments are determined by simulating each scenario for each individual item, keeping all other parameters constant in each case. Market value

changes that have no effect on the balance sheet include reclassified bonds and loans in the case of interest rate and credit spread risk.

In **life insurance** the interest rate assumptions are the crucial influencing factor on the liability adequacy test and deferred acquisition costs. The impact of the implied new funds assumption (including reinvestment) is therefore stated below.

If new funds are assumed with a +100 bp increase, then the resulting net effect (after accounting for the deferred profit participation) amounts to €8.5 million. A -100 bp reduction in this assumption results in a net effect of €-9.0 million. The effects described relate to the changes in deferred acquisition costs along with the impact on the liability adequacy test. The results were determined using

the traditional business in Austria which makes up the majority of insurance provision in the Group.

In **non-life insurance**, the provision for unsettled claims is formed based on reported claims and applying accepted statistical methods. One crucial assumption here is that the pattern of claims observed from the past can be sensibly extrapolated for the future. Additional adjustments need to be made in cases where this assumption is not possible.

The calculation of claim provisions is associated with uncertainty based on the time required to process claims. In

addition to the normal chance risk, there are also other factors that may influence the future processing of the claims that have already occurred. In particular, the reserving process for court damages in property and casualty insurance should be mentioned here. A reserve estimate is prepared here for these damages based on expert assessment, although this estimate can be exposed to high levels of volatility specifically with major damage at the start of the process for collecting court costs.

The partial internal model in property and casualty insurance is a suitable instrument for quantifying the volatility involved in processing. Pursuant to analysis of these model results, it was determined that a deviation of 5 per cent from the basic provision calculated may represent a realistic scenario. Based on the current provision for unsettled claims of €3,068.0 million (excluding additional provisions such as provisions for claim settlement) in the Group on a gross basis, this would mean an increase in claims incurred by €153.0 million.

Health insurance similar to life technique is now also affected by the period of low interest rates. Since 1 January 2018 only tariffs with the 1.0 per cent discount rate are being sold. That fact, together with the tariffs sold in 2017 at the discount rate of 1.75 per cent, further reduces the average discount rate. A reduction in the capital earnings by 100 bp (based on investment results 2019) would reduce the earnings before taxes by €38.2 million.

Liquidity risk

Ongoing liquidity planning takes place in order to ensure that UNIQA is able to meet its payment obligations over the next twelve months.

Obligations with a term of more than twelve months are covered by investments with matching maturities as far as possible within the framework of the ALM process and the strategic guidelines. In addition, a majority of the securities portfolio is listed in liquid markets and can be sold quickly and without significant markdowns if cash is required.

There are underwriting obligations mainly in the form of funds from holdings in healthcare and investments in private debt, as well as in the infrastructure sector, amounting to €574,187 thousand (2019: €565,916 thousand).

> 2025	500,000	60,000	560,000

¹⁾ Contractual maturities based on the first possible termination date**Concentration risks**

UNIQA strives to keep **concentration risks** as low as possible.

These could arise, for example, from the transfer of insurance business to individual reinsurance companies to an inappropriate extent. This can have a material influence on UNIQA's result in case of late payment (or non-payment) by an individual reinsurer. UNIQA controls such risks with an internal reinsurance company that is responsible for selecting external reinsurance parties, taking into account strict guidelines for avoiding material concentration risks.

However, concentration risk can also arise among other things from the composition of balance sheet items reported in the assets. Throughout the investment period, the company continuously checks to ensure that the investment volumes in securities of individual issuers do not exceed certain limits in relation to the total investment volume, defined according to the respective credit rating.

Underwriting risks

The underwriting risks are divided into non-life, life and health insurance.

The underwriting risk in **non-life** is broken down into the three risk categories of premium, reserve and catastrophe risk.

Premium risk is defined as the risk that future benefits and expenses in connection with insurance operations will exceed the premiums collected for the insurance concerned. Such a loss may also be caused in insurance operations by exceptionally significant, but rare loss events, known as major claims or shock losses. Natural catastrophes represent a further threat from events that are infrequent but that nevertheless cause substantial losses. This risk includes financial losses caused by natural hazards, such as floods, storms, hail or earthquakes. In contrast to major individual claims, insurance companies in this case refer to cumulative losses.

Reserve risk refers to the risk that technical provisions recognised for claims that have already occurred will turn out to be inadequate. The loss in this case is referred to as settlement loss. The claim reserve is calculated using actuarial methods. External factors, such as changes in the amount or frequency of claims, legal decisions, repair and/or handling costs, can lead to differences compared with the estimate.

To counter and actively manage these risks, UNIQA runs a number of processes integrated into its insurance operations. For example, a Group Policy specifies that new products may only be launched if they satisfy certain profitability criteria. Major claims and losses from natural catastrophes are appropriately managed by means of special risk management in the underwriting process (primarily in corporate activities) and by the provision of suitable reinsurance capacity.

In connection with claim reserves, guidelines also specify the procedures to be followed by local units when recognising such reserves in accordance with IFRSs. A quarterly monitoring system and an internal review process safeguard the quality of the reserves recognised in the whole of the Group.

An essential element in risk assessment and further risk management is the use of the non-life partial model. This risk model uses stochastic simulations to quantify the risk capital requirement for each risk category at both company and Group levels.

The entities acquired by AXA in Poland, the Czech Republic and Slovakia are still measured according to the EIOPA standard model as at 31 December 2020. They will be integrated into the Group model in 2021.

In **life insurance**, the underwriting risk is generally defined as the risk of loss or adverse developments affecting the value of insurance liabilities. It is divided into the categories mortality, longevity, disability-morbidity, lapse, expense, revision and catastrophe risk.

The mortality risk depends on possible fluctuations in mortality rates due to an increase in deaths which would have an adverse effect on the expected benefits to pay on risk insurance policies.

Longevity risk refers to the adverse effects of random fluctuations in mortality rates due to a decline in the mortality

rate. The insurer is thereby exposed to the risk that the anticipated life expectancy in the calculation of the premium will be exceeded in reality and that the expenditure for pension payments will be higher than planned.

The disability-morbidity risk is caused by possible adverse fluctuations in disability, sickness and morbidity rates compared to what they were at the time the premium was calculated.

The lapse risk arises from the fluctuations in policy cancellation, termination, renewal, capital selection and surrender rates of insurance policies. Overall, it represents the uncertainty regarding customer behaviour.

The expense risk refers to adverse effects due to fluctuations in the administrative costs of insurance and reinsurance contracts.

The revision risk results from fluctuations in the revision rates for annuities due to changes in the legal environment.

The catastrophe risk results from significant uncertainty in relation to pricing and the assumptions made in the creation of provisions for extreme/exceptional events.

The most relevant risk in this context is an immediate dramatic increase in mortality rates: in this case, death benefits in the risk portfolio could not be fully financed by the risk premium collected.

In the context of life insurance, the main techniques for risk mitigation are the adjustment of future profit participations or a corresponding premium adjustment as well as additional reinsurance policies, which are carried out in compliance with legal and contractual framework conditions. These measures are crucial for the underlying risk models and contain detailed information and regulations, particularly with regard to profit participation. In practice, profitable new business supports the risk-bearing capacity of the existing portfolio, whereby careful risk selection (e.g. health checks) and cautiously chosen calculation principles for premiums are essential cornerstones when designing products. By including premium adjustment clauses, the potential to reduce risk can be improved, especially in the risk and occupational disability portfolio.

The **health insurance business** is operated primarily in Austria. As a result, risk management in this line focuses mainly on Austria.

Health insurance is a loss insurance which is calculated under consideration of biometric risks and is operated in Austria according to the similar to life technique.

The risk categories of the underwriting risk in health insurance with the similar to life technique are based on the subdivisions of life insurance already described above, with minor deviations.

Analogous to life insurance, the main techniques for risk mitigation are the adjustment of future profit participations or a corresponding premium adjustment which is carried out in compliance with legal and contractual framework conditions. These measures are crucial for the underlying risk models and contain detailed information and regulations, particularly with regard to profit participation. In practice, classic risk-mitigation techniques are also relevant here.

For health insurance they include:

- Prudent setting of the discount rate at a level that can be earned in the long term;
- Risk selection, i.e. a targeted pre-selection of prospective customers for insurance products, for example through health checks;
- Careful selection of the withdrawal probabilities (death and policy cancellation) in order to obtain sufficient premiums for the expected benefits;
- The consideration of premium adjustment clauses in various health insurance products in order to be able to adjust premiums in line with changes in the calculation principles in case of changes in the expected values.

In addition to these classic risk mitigation techniques, an ongoing process for managing portfolios has been established. This process is carried out annually by determining and evaluating the need for rate adjustments. The effectiveness of the risk mitigation techniques described for the health business is assessed by comparing invoiced and actual benefits as well as by calculating contribution margin calculations.

Operational risk

Operational risk includes losses that are caused by insufficient or failed internal processes, as well as losses caused by systems, human resources or external events.

The operational risk includes legal risk, but not reputation or strategic risk. Legal risk is the risk of uncertainty due to lawsuits or uncertainty in the applicability or interpretation of contracts, laws or other legal requirements. At UNIQA, legal risks are monitored on an on-going basis, and reports made to the Group Management Board. UNIQA's risk management process also defined the risk process for operational risks in terms of methodology, workflow and responsibilities. The risk manager is responsible for compliance throughout all Group companies.

A distinctive feature of operational risk is that it can surface in all processes and departments. This is why operational risk is identified and evaluated in every operational company at a very broad level within UNIQA. Risks are identified with the help of a standardised risk catalogue that is regularly checked for completeness.

According to international standards, UNIQA – as a financial service provider – forms part of the critical infrastructure of key importance to the national community. If this infrastructure were to fail or become impaired, it would cause considerable disruption to public safety and security or lead to other drastic consequences.

As a rule, emergencies, crises and disasters are unexpected events for which it is impossible to plan, although systems and processes can be put in place to deal with such events. The systems and processes must then be treated as a special responsibility of management and must be dealt with professionally, efficiently and as quickly as possible.

UNIQA has implemented a business continuity management system covering the issues of crisis prevention, crisis management and business recovery (including business emergency plans). The UNIQA BCM model is based on international rules and standards and is developed on a continuous basis.

Emerging risk

Emerging risk refers to newly arising or changing risks that are difficult to quantify and can have a significant impact on an organisation. Among the main drivers of the changing risk landscape are new economic, technological, socio-political and ecological developments and the increasing interdependencies between them, which may lead to a growing concentration of risk. In addition, a changing business environment – the further development of regulatory rules, the increased expectations of stakeholders and the shift in risk perception – must be taken into account.

Reputational risk

The reputational risk describes the risk of loss that arises due to possible damage to the company's reputation, a deterioration in prestige, or a negative overall impression due to negative perception by customers, business partners, shareholders or supervisory agencies.

Reputational risks that occur in the course of core processes such as claim processing or advising and service quality are identified, evaluated and managed as operational risks in the Group companies.

Contagion risk

Group risk management analyses whether the reputation risk observed in the Group or in another unit may occur, and whether the danger of "contagion" within the Group is possible. The analyses performed guard against contagion risk.

Strategic risk

The strategic risk refers to the risk that results from management decisions or insufficient implementation of management decisions that may influence current or future income or solvency. This includes the risk that arises from management decisions that are inadequate because they ignore a changed business environment. Like operational and reputational risks, strategic risks are evaluated on an ongoing basis.

Sustainability risk

Sustainability risks are not currently classified as a separate risk category but are allocated among the existing categories. Up until now, UNIQA has identified potential sustainability risks with the following topics from the materiality analysis: clear evaluation of damage and rapid assistance, process for handling data and new technologies, customer information and financing, complaints management, avoidance of critical investment, employee satisfaction as well as ethics and compliance. UNIQA's risk identification process is subject to continuous development and will also ascertain in the future whether an identified risk is relevant from a sustainability point of view. According to the definition used by UNIQA this is the case if a risk exists in relation to ecological and/or social aspects of the sustainability topics.

45. Reinsurance

The Group Management Board determines, directly and indirectly, the strategic contents of reinsurance policy with its decisions regarding risk and capital policy. The structure of the purchasing of external reinsurance is linked to the risk management process, thus enabling the risk capital to be relieved.

Reinsurance structures support the continuous optimisation of the required risk capital and the management of the use of this risk capital. Great importance is attached to the maximum use of diversification effects. Continuous analysis of reinsurance purchasing for efficiency characteristics is an essential component of internal risk management processes.

UNIQA Re AG in Zurich, Switzerland, is responsible for the operational implementation of these tasks. It is responsible for and guarantees the implementation of reinsurance policies issued by the Group Management Board. UNIQA Re AG is available to all Group companies as the risk carrier for their reinsurance needs.

The assessment of the exposure of the portfolios assumed by the group companies is of central importance. Periodic risk assessments have been performed for years in the interest of a value-based management of the capital commitment. Extensive data are used to assess risk capital requirements for the units in question and their reinsurance programmes are structured in a targeted manner.

For the property and casualty insurer, promises of performance for protection against losses resulting from natural hazards frequently represent the greatest stress on risk capital by far due to the volatile nature of such claims and the conceivable amount of catastrophic damages. UNIQA has set up a specialised unit in order to deal with this problem. Exposure is constantly monitored and evaluated at the country and Group levels in cooperation with internal and external authorities. UNIQA substantially eases the

pressure on its risk capital through the targeted utilisation of all applicable diversification effects and the launching of an efficient retrocession programme.

UNIQA Re AG has assumed almost all of the UNIQA Group's required reinsurance business ceded in the reporting period. Only in the life insurance line was a portion of the necessary cessions given directly to external reinsurance partners. The Group assumes reasonable deductibles in the retrocession programmes based on risk- and value-based approaches.

Approval for publication

These consolidated financial statements were prepared by the Management Board as at the date of signing and approved for publication.

Auditor's Report

Report on the Consolidated Financial Statements

Audit Opinion

We have audited the consolidated financial statements of UNIQA Insurance Group AG, Vienna, and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2020, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of cash flows and the consolidated statement of changes in equity for the financial year then ended, and the notes.

In our opinion, the accompanying consolidated financial statements comply with legal requirements and give a true and fair view of the financial position of the Group as at 31 December 2020, and of its financial performance and cash flows for the financial year then ended in accordance with International Financial Reporting Standards as adopted by the EU (IFRSs) and the additional regulations of section 245a Austrian Company Code and the supplementary provisions of section 138 para. 8 Austrian Insurance Supervision Act.

Basis for Opinion

We conducted our audit in accordance with Regulation (EU) No. 537/2014 (hereinafter EU Regulation) and Austrian Generally Accepted Standards on Auditing. Those standards require the application of the International Standards on Auditing (ISAs). Our responsibilities under those provisions and standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the Group in accordance with Austrian Generally Accepted Accounting Principles and professional requirements, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained until the date of the auditor's report is sufficient and appropriate to provide a basis for our opinion by this date.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the financial year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have structured key audit matters as follows:

- Description
- Audit approach and key observations
- Reference to related disclosures

1. Recognition and measurement of the restructuring provision in the course of the strategy programme UNIQA 3.0

- Description

In the financial year 2020, an extensive strategy programme for the upcoming years called UNIQA 3.0 was agreed and approved. An essential element of the programme is the downsizing of the workforce intended to be achieved by terminating contracts by way of mutual consent and agreeing on a social plan. Taking into account the planned measures, a provision in the amount of EUR 98,587k was set up. The measurement of this restructuring provision is based on discretionary decisions, estimates and assumptions, in particular with regard to the likelihood of whether the affected employees will accept the termination offers presented to them.

Due to the matter described, we considered the recognition and measurement of the restructuring provision as a key audit matter in our audit.

- Audit approach and key observations

We:

- examined the criteria and prerequisites for recognizing the provision,
- tested the systematics in deriving the assumptions and parameters for calculating the provision,
- checked whether these assumptions and parameters match the agreed social plan,
- reconciled, based on samples, the inputs taken into consideration in the calculation of the provision and
- took into consideration, in our assessment of the measurement of the provision at the reporting date, the findings established in the course of employee interviews and the actual contract terminations occurred within the adjustment period until the date of this report.

The accounting and measurement methods applied are in accordance with IFRSs. We consider the recognition and measurement of the restructuring provision to be plausible and reasonable.

- Reference to related disclosures

Refer to chapter “Use of discretionary decisions and estimates” under General information in the notes as well as “19. Restructuring measures” in the notes to the consolidated financial statements

2. Measurement of goodwill as well as of other intangible assets

- Description

Goodwill in the amount of EUR 352,922k as well as intangible assets still under development in the amount of EUR 64,544k, which mainly relate to software development in the course of the renewal of the Group-wide IT systems, are tested for impairment at least once a year and additionally whenever there is an indication for impairment.

The impairment tests carried out for this purpose require the Management Board to make discretionary decisions, estimates and assumptions, which particularly includes budgeted cash flows in the individual cash-generating units, future market conditions, growth rates and capital costs. Changes in these assumptions as well as in the methods used may have a material impact on measurement.

Due to the matter described, we considered the measurement of goodwill as well as of other intangible assets as a key audit matter in our audit.

- Audit approach and key observations

We:

- evaluated work flows and the measurement approach as well as tested selected key controls,
- compared the accounting and measurement methods with the accounting provisions of IAS 38 and IAS 36,
- examined whether the calculation method of the impairment test is appropriate and assessed the significant discretionary decisions and assumptions,
- verified the derivation of the capital costs and juxtaposed it to a calculation we made ourselves and
- compared the company planning approved by the Management Board and Supervisory Board with the cash flows included in the impairment test.

The accounting and measurement methods applied are in accordance with IFRSs. We consider the underlying assumptions and measurement parameters to be plausible and reasonable.

- Reference to related disclosures

Refer to chapter “Use of discretionary decisions and estimates” under General information in the notes as well as “12. Intangible assets” in the notes to the consolidated financial statements

3. Acquisition of AXA subsidiaries in Poland, the Czech Republic and Slovakia

- Description

On 7 February 2020, a purchase agreement was concluded with AXA and its subsidiary Société Beaujon covering the acquisition of AXA subsidiaries and branches in Poland, the Czech Republic and Slovakia. The acquisition was completed after all necessary regulatory approvals were obtained as per 15 October 2020. The purchase price amounted to EUR 998,330k.

The business combination is accounted for according to IFRS 3.

The assets, liabilities and contingent liabilities acquired were stated at their fair values which were determined in the course of the purchase price allocation performed. This results in preliminary net assets measured at fair value in the amount of EUR 778,653k and goodwill in the amount of EUR 219,677k.

The purchase price allocation performed requires the Management Board to make discretionary decisions, estimates and assumptions. Changes in these assumptions may have a material impact on the fair values.

Due to the matter described, we considered the business combination and in particular the purchase price allocation as a key audit matter in our audit.

- Audit approach and key observations

We:

- verified, based on the purchase agreements and the agreements under company law as well as the criteria defined in IFRS 10, the assessment made by the Management Board with regard to the control over the shares taken over and the consolidation in the consolidated financial statements,
- assessed the methodical approach in identifying the assets acquired and liabilities assumed at the acquisition date,
- verified the measurement methods applied and examined, consulting component auditors in Poland and the Czech Republic, the determination of the identifiable assets acquired as well as of the liabilities and contingent liabilities assumed and
- examined the disclosures on the acquisition made in the notes in accordance with the requirements of IFRS 3.

The accounting and measurement methods applied are in accordance with IFRSs. We consider the underlying assumptions and measurement parameters to be plausible and reasonable.

- Reference to related disclosures

Refer to chapter “1. Acquisition of AXA companies” under General information in the notes

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements, the management report for the Group and our auditor’s report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor’s report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and the Audit Committee for the Consolidated Financial Statements

Management is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU (IFRSs) and the additional regulations of section 245a Austrian Company Code and the supplementary provisions of section 138 para. 8 Austrian Insurance Supervision Act, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation and with Austrian Generally Accepted Standards on Auditing, which require the application of ISAs, will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the EU Regulation and with Austrian Generally Accepted Standards on Auditing, which require the application of ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
 - evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
 - conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
 - evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
 - obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.
- identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risks of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with all relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Comments on the Management Report for the Group

Pursuant to Austrian Generally Accepted Accounting Principles, the management report for the Group is to be audited as to whether it is consistent with the consolidated financial statements and as to whether the management report for the Group was prepared in accordance with the applicable legal regulations.

Management is responsible for the preparation of the management report for the Group in accordance with Austrian Generally Accepted Accounting Principles and the provisions of the Austrian Insurance Supervision Act.

We conducted our audit in accordance with Austrian standards on auditing for the audit of the management report for the Group.

Opinion

In our opinion, the management report for the Group was prepared in accordance with the applicable legal regulations, comprising the details in accordance with section 243a UGB, and is consistent with the consolidated financial statements.

Statement

Based on the findings during the audit of the consolidated financial statements and due to the obtained understanding concerning the Group and its circumstances no material misstatements in the management report for the Group came to our attention.

Additional Information in Accordance with Article 10 of the EU Regulation

We were elected as statutory auditor at the ordinary general meeting dated 20 May 2019. We were appointed by the Supervisory Board on 16 December 2019. Besides that, we were elected as auditor for the following financial year by the ordinary general meeting on 25 May 2020 and appointed by the Supervisory Board on 30 November 2020. We have audited the Company for an uninterrupted period since 31 December 2013.

We confirm that the audit opinion in the “Report on the Consolidated Financial Statements” section is consistent

with the additional report to the Audit Committee referred to in Article 11 of the EU Regulation.

We declare that no prohibited non-audit services (Article 5 para. 1 of the EU Regulation) were provided by us and that we remained independent of the audited company in conducting the audit.

Responsible Engagement Partner

Responsible for the proper performance of the engagement is Werner Stockreiter, Austrian Certified Public Accountant.

Information

This is a translation of the German Group Report of UNIQA Group. In case of any divergences, the German original is legally binding.

Clause regarding predictions about the future

This report contains statements which refer to the future development of the UNIQA Group. These statements present estimations which were reached on the basis of all of the information available to us at the present time. If the assumptions on which they are based do not occur, the actual events may vary from the results currently expected. As a result, no guarantee can be provided for the information given.
